Dear Mr. Petersen:

Subject: City of Hamilton Submissions on Bill 139 – Building Better Communities and Conserving Watersheds Act, 2017, Schedule 3

On behalf of the City of Hamilton, I am pleased to provide this letter as the Hamilton’s submission on Schedule 3 of Bill 139. Please find attached to this letter an outline of the key submissions the City wishes to make on the proposed changes to the land use planning appeals system and other planning changes contained in the Bill.

The Province should be commended for preparing this Bill and consulting with municipalities as key stakeholders. The City is optimistic that once in effect the changes proposed will lead to positive changes for the land use planning appeal system in Ontario. A greater emphasis on local decision-making is welcomed by the City.

We look forward to seeing the results of the consultation on Bill 139. City staff would be pleased to meet with you to discuss these comments in greater detail.

Sincerely,

Mayor Fred Eisenberger

City of Hamilton Submissions on Bill 139

Submissions on Schedule 3 changes to the land use planning appeals system:

- Generally, the City supports Bill 139 and the proposed changes to the land use planning appeals system.

- In particular, the City supports the proposed amendments to the Planning Act that would emphasize the importance of local decision-making.

- The City supports the changes proposed that would restrict the breadth of appeals that can be made against municipal decisions, particularly where those decision were approved by the Minister.

- The City supports the proposed requirement to send matters back to the municipality for a second decision where the initial decision was found to be inconsistent or nonconforming with policies or plans. However, in the event that Council elects to make an amendment pursuant to those subsections, the process set out in the relevant section would be difficult to accomplish within the 90-day time period. This time period should be extended to allow time for responsibly planned amendments to be prepared under those sections.

- The City requests that it be consulted with on any future transition provisions or regulations necessary to give effect to the switch-over from the OMB to LPAT system.

- Generally, the Planning Act has become a cumbersome document and could be improved by updating and re-consolidating the Act, streamlining the numerical references and updating the language of the provisions for readability. The City would support a future repeal/replace of the Act with the goal to improve the language and readability of the planning processes.

Submissions on Schedule 3 changes to the land use planning system, as well as other submissions on land use planning provisions:

- The City supports the policy changes relating to climate change and higher order transit but request that the Ministry further refine and narrow the range of appeal permission under the Planning Act.

- The City supports the proposed moratorium on appeals to a Secondary Plan before the second anniversary of the first day of any part of the Secondary Plan coming into effect.

- The Bill should be amended to expand the description of a Secondary Plan to include large, individual parcels of land.
• The Bill should be amended to adjust the timeframe to make a decision on a Zoning By-law Amendment and a Plan of Subdivision to 210 days to create one standard timeframe and expand the one-time extension of 90 days introduced by Bill 73 to Zoning By-law Amendments and Plans of Subdivision.

• Allow for a lengthened timeframe commencing on the day an application is deemed complete for Official Plan Amendments without the need to give notice. This should also be expanded to apply to Zoning By-law Amendments and Plans of Subdivision.

• Remove the ability to terminate the 90 day extension.

• The Bill should provide municipalities with the ability to restart the timeframe if additional information is deemed necessary by the municipality or conversely the application is amended by the applicant which results in a recirculation of the application to the prescribed agencies / bodies for review and comment.

• The Ministry should provide municipalities with the flexibility to determine their own parkland dedication rate and provide municipalities with the ability to defer dedication through registered agreements.

• The Bill should expand the two-year moratorium to amend Official Plans and Zoning By-laws to include all amendments that constitute a new Official Plan and comprehensive Zoning By-law and provide Council with the ability to determine if an amendments is needed in the case of an error.

• The Bill should remove the right to appeal Official Plan Amendments and Zoning By-law Amendments that support matters that are provincially approved.

• That the Ministry meet directly with the City to discuss our experiences with minor variances and what we believe constitutes a minor variance to assist the Ministry with defining what constitutes a minor variance.

• The Act should require, as part of an appeal, demonstration that the appellant has engaged with the municipality in a fulsome way.

• The Ministry should develop clear guidelines that identify the information to be included in a notice of decision and how this information is to be shared.

• That the Planning Acts should be amended to require the Ministry to align its own policy reviews and increase the mandatory 5-year Official Plan review period to 10-years.

• The Ministry eliminate the right to appeal for non-decision, defer the start time to the date an application is deemed complete (as opposed to accepted), or alternatively, refine the permissions for appeals for non-decision.
• The Ministry is encouraged to develop a regulation for subsection 34(16) of the Planning Act (conditional zoning).

• The Ministry should amend the Planning Act to make pre-consultation with municipalities mandatory for applications under the Planning Act, except minor variance and consent applications, and ensure that an application cannot be deemed complete unless all required applications are submitted as a complete package.

• The Ministry should amend the Planning Act to include the requirement/discretion for further consultation with a pause in the timing for review of a Planning Act application if there are outstanding issues.

• The Ministry should amend the Planning Act to require giving notice through means other than newspapers or mail, and to expand the notification requirements to include tenants.

• The Ministry should make the appropriate legislative changes to allow municipalities to plan for a 50-year planning horizon instead of 20 years.

• The Ministry should make the appropriate legislative changes to give more power to municipalities to protect future employment lands and uses, and make provision for “soft infrastructure” for the long-term benefit of the municipality.

• The Act should be amended such that notices be provided by first class Canada Post mail, that the notification be provided to every resident within 500m of the subject property, and with the additional postage cost be funded by the applicant.

• The Ministry should amend the transportation and land use planning policies to better support the achievement of compact, complete communities with increased active transportation and public transit through changes to the Planning Act.

• The Ministry should support a public health perspective on the achievement of healthy, compact, complete communities by actively supporting the involvement of health units in land use planning in municipalities.
