7.2 International Charter for Walking

(Farr/Green)

WHEREAS, the City of Hamilton signed the International Charter for Walking on April 8, 2008;

WHEREAS, the International Charter for Walking reflects creation of healthy, efficient and sustainable communities where people choose to walk;

WHEREAS, the Charter recognizes the benefits of walking as a key indicator of healthy, efficient, socially inclusive and sustainable communities and acknowledges the universal rights of people to be able to walk safely and to enjoy high quality public spaces anywhere and at any time;

WHEREAS, the City of Hamilton is committed to reducing the physical, social and institutional barriers that limit walking activity;

WHEREAS, the City of Hamilton will work with others to help create a culture where people choose to walk through our commitment to this charter and its strategic principles:

1. Increased inclusive mobility;
2. Well designed and managed spaces and places for people;
3. Improved integration of networks;
4. Supportive land-use and spatial planning;
5. Reduced road danger;
6. Less crime and fear of crime;
7. More supportive authorities; and,
8. A culture of walking;

WHEREAS, the City of Hamilton has been awarded a Silver WALK Friendly designation for developing a city-wide plan that specifically addresses the needs and interests of pedestrians, harnessing the power of social media to engage residents in active transportation, an impressive traffic-calming pilot, as well as the City's adoption of a Complete Streets policy;

WHEREAS, the City's long-standing commitment to being a walkable city including the International Charter for walking and the subsequent participation in the Canadian Walking Master Class in 2009;

WHEREAS the City has taken steps towards a walkable Community including:

- Addressing the issues facing pedestrians was a key factor in developing the Pedestrian Mobility Master Plan. The plan establishes a 20-year (2031) framework to improve the pedestrian environment and increase the opportunity for walking as a mode of transportation and recreation that is efficient, comfortable, safe, inclusive, accessible, in addition to improving the health of communities and increasing economic development;

- Hamilton has an Active Transportation Benchmarking Program where automated counts are conducted along trail corridors. Over 75 locations are surveyed on a weekly basis, including multi-use trails, sidewalks, and bicycle lanes. This information is being used to develop seasonal trends, identify commuter trails, and destination-based recreational facilities in the city, as well as to identify impacts of trail development and upgrades. The data is also being used to forecast annual, active transportation use. For example, in 2017, the City recorded over one-million walking trips up and down the Chedoke stairs. The Kimberly staircase has recorded half a million uses and the Wentworth stairs had slightly less than 400,000 in 2017;
- A traffic calming pilot introduced a 30km speed limit in a neighbourhood of about 5,200 residents and monitors the impact on pedestrians, cyclists, and the overall well-being of residents. The City is further improving safety for pedestrians by regularly implementing ladder-style marked crosswalks at controlled intersections — a style that is more visible to motorists and implementing Pedestrian Crossover locations to provide and safe crossing locations;
- The City is using social media to get the word out about walking. The City launched a transportation web page called Smart Travel, designed to get residents to where they need to go using sustainable modes of transportation. The web page provides citizens and visitors with instant access to information on getting around by transit, walking, cycling, carpooling, car share, and taxi. Hamilton also uses social media sites such as Facebook and Twitter to promote walking initiatives, and is redeveloping web pages to establish a cross-departmental, cross-organizational, transportation-focused website with a one-stop shopping element;
- Hamilton has adopted a Complete Streets policy that is included in the Urban Hamilton Official Plan (LINK), and also reached out to residents through social media to establish a Complete Streets communications strategy. Using the Complete Streets Policy, the City has undertaken road reconstruction projects that included pedestrian-friendly changes such as wider sidewalks, better lighting and improved crosswalk treatments;
- Open Streets events have been held in the City since 2010. The events have taken place on two different streets and have included the closure of 2 – 4km of road. Approximately 10,000 – 15,000 people have participated in each event;
- To ensure that schools and workplaces have active transportation-supportive amenities and infrastructure available, such as showers and lockers, bike parking, healthy food options, drinking fountains, and benches, etc., the city conducts site evaluations for schools (as

part of school travel plans) and workplaces (as part of Smart Commute); and,

- The City of Hamilton participates in the Smart Commute employer-based program and is leveraging the program by using employee survey data to identify the percentage of staff that are located in a walkable area. The City then uses the information to develop specific interventions to encourage more targeted behaviour change; and,

WHEREAS, the City of Hamilton celebrates its participation in the wide variety of events and projects that have been undertaken since signing the International Charter for Walking in 2008 and continues to promote and support initiatives to make Hamilton a Walk-Friendly community.

THEREFORE BE IT RESOLVED:

That City Council reaffirms its support and commitment to the International Charter for Walking.

The Motion CARRIED unanimously on the following Standing Recorded Vote:

Dear Mr. Murray,

RE: Hamilton LRT Procurement

I am writing to respond on behalf of the Province and Metrolinx to Hamilton City Council's December 18, 2017 motion regarding the procurement model for the Hamilton Light Rail Transit (LRT) system.

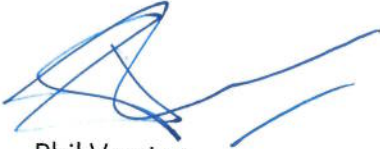

I am pleased that Council has endorsed continuing with the Design-Build-Finance-Operate-Maintain (DBFOM) delivery model for the project. This is a very positive outcome that will support on-time, on-schedule delivery of the project. The DBFOM model highly incentivizes ProjectCo to provide a quality design, durable construction, cost effective maintenance and efficient operations for the 30 year concession period.

With this decision, we are now prepared to move forward with the release of the Request for Proposals in the coming weeks. This will allow us to continue to advance towards key project milestones, including construction start in late 2019 and having the LRT in service in 2024. The support of the City and our continued collaboration will be crucial to a timely RFP release and ensuring the project is delivered on schedule.

Regarding the labour related requests in Council's motion, we will ensure each of the proponents are made well aware of Council's requests as they develop their submissions. As ProjectCo will have a long term presence in the community through the construction and operations and maintenance periods, we believe there is a strong incentive for the bid teams to prioritize building positive relationships with the City as well as community and labour stakeholders. I commit to keeping you informed of our progress as the procurement proceeds.

I thank the City for its continued interest and support. I trust this response demonstrates the commitment of the Province and Metrolinx to the LRT project and our willingness to continue working in partnership with the City.

Sincerely,

Phil Verster

Community Energy Plan

Terms of Reference

A Community Energy Plan (CEP) is an integrated, comprehensive, long-term plan to meet local energy needs while improving energy and water efficiency, reducing greenhouse gas (GHG) emissions and fostering local sustainable and community supported energy solutions in a municipality. Community Energy Planning takes an integrated approach to local energy planning by aligning energy, infrastructure and land use planning to help meet community energy goals and reduce GHG emissions. As part of the City of Hamilton's strategic priority to become a clean and green city that is environmentally sustainable, and as part of the City's Community Climate Change Action Plan to reduce GHG emissions and adapt to a changing climate, the City has initiated a process to develop a CEP with the input of energy stakeholders and the community.

By year 2041, the City is expected to grow to achieve a population of 780,000 and 350,000 jobs. Most of this growth will be achieved through intensification; as such, by 2031, and for each year thereafter, a minimum of 60 per cent of all residential development will occur within the built-up area. The intent of the CEP is to develop an action plan based on community priorities around energy and water with a goal to improve efficiency, cut GHG emissions, increase the use of renewable energy, achieve energy security, and drive economic development. Through the implementation of the CEP, Hamilton is expected to benefit from establishing a healthier community; supporting the development of complete, compact and healthy communities; keeping energy investments local; supporting local businesses to reduce energy costs and encourage new investments; contributing to local job creation and energy costs savings; and, reducing energy spending for residents while increasing property values.

1. Background:

The City undertook Community Energy mapping in 2011, and there are a number of energy-related initiatives being undertaken locally by the City of Hamilton (with respect to its corporate assets) and by utilities, and local groups to improve energy conservation. Still, Hamilton does not have a comprehensive city-wide, community based (i.e. non-City assets in the residential, commercial, health care and industrial sectors) energy plan to achieve established targets.

Hamilton City Council passed a motion on July 7, 2015, directing "That Planning and Public Works staff investigate and report back on the feasibility and Terms of Reference for a Community Energy Plan including but not limited to Renewable Energy Projects;

appropriate planning policies; methods and uses, in consultation with Hamilton Utilities Corporation".

In October 2015, Council endorsed the Community Climate Change Action Plan, which was developed as a collaborative effort from multiple City departments and community partners through extensive community consultation. This Action Plan outlines an approach to address climate change by the Hamilton community and establishes long-term goals and directions within nine themes to guide the community on taking action on climate change. Ten priority actions were identified for community action in the short term (1-3 years), including to "Develop a Community Energy Plan to guide the Hamilton community's energy future".

This Terms of Reference for a CEP responds to Council's direction, and to the City of Hamilton's Community Climate Change Action Plan (2015) priority action.

Policy Direction:

Provincial planning policies include an emphasis on energy conservation, air quality and climate change adaptation. The 2014 Provincial Policy Statement (PPS) requires planning authorities to support energy conservation and efficiency, improved air quality, reduce GHG emissions, and climate change adaptation through land use and development patterns that create compact urban forms. Municipalities shall promote design and orientation which maximizes energy efficiency and conservation, and maximizes opportunities for the use of renewable energy systems and alternative energy systems.

Similarly, the recently updated Growth Plan for the Greater Golden Horseshoe (Growth Plan, 2017) mandates local municipalities to coordinate the planning for new or expanded infrastructure with land use planning through the development of integrated plans including community energy plans. Municipalities will also develop and implement official plan policies and other strategies to support water conservation, energy conservation, air quality improvement and protection, and integrated waste management. In order to achieve energy conservation for existing buildings and planned developments, municipalities will identify opportunities for conservation, energy efficiency and demand management, as well as district energy generation, renewable energy systems and alternative energy systems and distribution through community, municipal and regional energy planning.

Municipal Initiatives and Partnerships:

Although the City of Hamilton does not have a formal Community Energy Plan, the City has demonstrated municipal leadership in addressing climate change, energy conservation and renewable energy. The City's first Corporate Energy Policy, passed by Council in 2007, called for targeted energy reductions in energy intensity of City-owned facilities and operations of 20% by year 2020. The Corporate Energy Policy was updated in 2014 with new targets, including the reduction of energy intensity in City-owned facilities by 60% by 2050; 20% improvement of corporate average fuel efficiency (CAFÉ) in City fleet vehicles by 2030; reduction of 80% Greenhouse Gas emissions by 2050; and track energy intensity by Hamilton Water.

The City of Hamilton has established GHG emissions reduction targets of 2006 baseline GHG emissions in the community. These targets are:

- 20% by 2020;
- 50% by 2030; and,
- 80% by 2050.

Currently the community has achieved the 2020 emissions targets and are aiming to progress towards achieving the 2030 and 2050 targets. In addition, the City has been a member of the Federation of Canadian Municipalities' Partners for Climate Protection (PCP) program since 1996. The PCP program is a network of Canadian municipal governments that have committed to reducing GHG and to acting on climate change. Hamilton completed the PCP program's 5-milestone process in 2013 and has become one of the leading Canadian municipalities taking action to mitigate and adapt to climate change. The City is also a member of the Compact of Mayors since 2015. The Compact of Mayors is the world's largest cooperative effort among mayors and city officials to reduce greenhouse gas emissions and climate risks in cities.

More recently, in June 2017, the City of Hamilton, City of Burlington and Mohawk College formed the Bay Area Climate Change Partnership. The three organizations will share resources and coordinate efforts to reduce greenhouse gas emissions. The goal of the partnership is to create a Centre for Climate Change Management within the next two years and establish a Campus Carbon Management Office, an Industry Partnerships Office and a Bay Area Climate Change Coordination Office and modelled after the successful Bay Area Restoration Council.

2. **Goal:**

To develop a meaningful CEP that guides Hamilton towards the creation of a healthy, reliable and sustainable energy future by continually increasing water and energy conservation, improving energy efficiency and reducing GHGs emissions while meeting Hamilton's energy needs.

3. **Objectives:**

The objectives of the plan are:

- To reconnect with stakeholders, agencies, landowners, and the public.
- To confirm community-wide energy consumption and GHG emissions.
- To identify opportunities for energy and water conservation, generation, efficiency as well as sustainable, cleaner and energy efficient transportation throughout the City of Hamilton.
- To develop community priorities for implementation around renewable energy and other energy infrastructure, including a HERO/LIC program for the City.

CITY OF HAMILTON

NOTICE OF MOTION

Council: April 11, 2018

MOVED BY COUNCILLOR A. JOHNSON.....

Reconsideration of Item 11 of the General Issues Committee Report 16-017, respecting Report PED16141 - Desjardin Canal Hwy 403 Bridge Commemorative Public Art

WHEREAS, at its meeting of July 16, 2016, Council approved sub-sections (a) and (b) to Item 11 of the General Issues Committee Report 16-017, which read as follows:

11. Desjardin Canal Hwy 403 Bridge Commemorative Public Art (PED16141) (City Wide) (Item 8.6) (attached hereto)

- (a) That, pending the successful selective demolition of the existing east bound Highway 403 Bridge over the Desjardin Canal and capping of the ten remaining concrete columns by the Ministry of Transportation (MTO), the City of Hamilton **take ownership** of the columns for a future commemorative public art project;
- (b) That the Mayor and City Clerk be authorized and directed to execute an agreement between the City of Hamilton and Ministry of Transportation (MTO) for the City of Hamilton to **take ownership** of the remaining bridge columns at the 403 Bridge over the Desjardin Canal, in a form satisfactory to the City Solicitor;

WHEREAS, after further consideration, the Ministry of Transportation (MTO) no longer wishes to enter into an agreement with the City of Hamilton (City) to take ownership of the ten capped-columns that will remain, subsequent to the successful demolition of the existing east-bound Highway 403 bridge over the Desjardin Canal;

WHEREAS, the MTO has advised that as it allows for flexibility in the event of a future widening of Highway 403; and, would provide clarity for ongoing responsibilities between the MTO and City with respect to the existing trail and public art on the Hwy 403 right-of-way, a agreement for the City of Hamilton to take over the maintenance of the remaining bridge columns at the 403 Bridge over the Desjardin Canal and the Waterfront Trail through the Hwy 403 right of way, is the only available option at this time;

THEREFORE BE IT RESOLVED:

That sub-sections (a) and (b) to Item 11 of the General Issues Committee Report 16-017, respecting Report PED16141 - Desjardin Canal Hwy 403 Bridge Commemorative Public Art, be reconsidered.

CITY OF HAMILTON
BY-LAW NO. 18-

To Impose a Storm and Sanitary Sewer Charge Upon Owners of Land Abutting Rymal Road West from 350 Rymal Road West to Approximately 200m Westerly, in the City of Hamilton.

WHEREAS the Council of the City of Hamilton authorized recovering a portion of costs associated with the construction of Sewer Works by approving, on September 26, 2007, Item 17 of Public Works Committee Report 07-011 (Report TOE02005b/FCS02026b/PED07248); and

WHEREAS a developer, Spallacci & Sons Limited, in satisfaction of terms and conditions of subdivision agreement "Eden Park Phase 1", Plan 62M-1166, did construct Sewer Works, in the City of Hamilton, as more particularly described in Schedule "A" attached to this by-law; and

WHEREAS the cost of the Sewer Works to be recovered from all benefitting property owners is \$184,690.00.

NOW THEREFORE the Council of the City of Hamilton enacts as follows:

1. Sewer Charges are imposed upon the owners or occupants of land who benefit from the construction of the Sewer Works (the "Assessed Owners").
2. The Assessed Owners' lands and the respective Sewer Charges are more particularly described in Schedule "A", which Schedule is attached to and forms part of this By-law.
3. The Sewer Charges have been established using the approved method for cost apportionment per City of Hamilton Report TOE02005b/FCS02026b/PED07248 (Funding Methodologies for Municipal Infrastructure Extensions Review and Update), establishing a Flat Fee Storm Sewer Charge of \$9,045.00 and a Flat Fee Sanitary Sewer Charge of \$7,745.00 attributable to each unit owned by each Assessed Owner of an existing residential lot. The Flat Fees shall be annually adjusted to the current rate in the City's User Fees and Charges By-law.
4. The amount resulting from the application of the Sewer Charges (the "Indebtedness"), shall be collected at the time of permit issuance for any connection to the said Sewer Works, in addition to any applicable permit fee.

5. The Assessed Owners have the option of paying the Indebtedness by way of annual payments over a period of 15 years from the date of permit issuance for connection by entry on the tax roll, to be collected in like manner as municipal taxes. The interest rate utilized for the 15 year payment shall be the City of Hamilton's then-current 15 year borrowing rate (2018 rate-3.25%).
6. Notwithstanding Section 5, as Assessed Owner of a parcel described in Schedule "A" may pay the commuted value of the Indebtedness without penalty, but including interest, at any time.
7. Should an Assessed Owner sever or subdivide their parcel of land, the Sewer Charges owed to the City of Hamilton, whether the parcel of land is connected or not, and whether or not the Assessed Owner has previously exercised the repayment option set out in Section 5 above, shall be paid forthwith to the City of Hamilton in a lump sum as a condition of the severance or subdivision approval.
8. The developer, Spallacci & Sons Limited, upon satisfying the City that it has completed its obligations with respect to the construction of the said Sewer Works, shall receive repayment of that portion of the associated cost of the construction collected hereunder, pursuant to the terms and conditions of its subdivision agreement.
9. Unpaid Sewer Charges constitute a debt to the City and may be added to the tax roll and collected in the same manner as municipal taxes.
10. If any provision or requirement of this By-law, or the application of it to any person, shall to any extent be held to be invalid or unenforceable by any court of competent jurisdiction, the remainder of the By-law, or the application of it to all persons other than those in respect of whom it is held to be invalid or unenforceable, shall not be affected, and each provision and requirement of this By-law shall be separately valid and enforceable.

1014 King Street West (Westdale Theatre)
Hamilton, Ontario

**STATEMENT OF CULTURAL HERITAGE VALUE OR INTEREST AND
DESCRIPTION OF HERITAGE ATTRIBUTES**

Introduction and Description of Property

The Westdale Theatre, located at 1014 King Street West, is situated on the north side of the street, between Paisley Avenue North and Marion Avenue North, in the City of Hamilton. The two-storey movie theatre was designed in the Art Deco-style and was constructed circa 1935.

Statement of Cultural Heritage Value or Interest

Physical / Design Value

The Westdale Theatre possesses design value as a representative example of the Art Deco style of architecture. The Westdale Theatre is the only theatre constructed in Hamilton influenced by this design movement and purpose-built for sound. The theatre can be considered a technical achievement of its time as its design was guided by decisions that would perfect the sound and visual experience of its patrons. The theatre exhibits Art Deco features on the exterior façade with its stone carvings, pressed metal panels with triangular motif above the entryway doors and original marquee that is likely still located behind the contemporary layer. Interior Art Deco features include wall and ceiling mouldings, the ziggurat-style window and door openings throughout the theatre, as well as the engaged pillars. Other significant attributes include but are not limited to the red brick piers woven into the concrete block cladding, window and door openings, and the layout of the auditorium, which includes the placement of seats and two downward sloping aisles, the two door openings on either side of the stage and the metal railings.

Historical / Associative Value

The Westdale Theatre is associated with the development of film technology and the design of movie theatres. Westdale Theatre was the first theatre built locally for sound and included the modern technology of its time. Modern comforts and technology featured when the theatre opened in 1935 included "Dunlopillo" seats, the latest air conditioning, R.C.A. Victor Photophones High Fidelity sound reproduction, and a scientifically designed non-reflecting screen. The theatre is believed to have been designed by prominent Hamilton architect William James Walsh in 1932 and the building plans were updated in 1935 by architect W.

Bruce Riddell. Both architects went on to design movie theatres in Hamilton and Oshawa, respectively.

The property is also associated with the development of Westdale Village as a planned suburban community. The neighbourhood's original layout was proposed only two decades before the theatre was built circa 1935 and its name was coined in 1923. The Westdale Theatre is located in the core of the community's self-sustaining commercial strip on King Street West. The façade of Westdale Theatre has evolved over time with the addition of the green "Westdale" sign between 1959 and 1976 in its heyday which has since become a well-known sign along the commercial strip of King Street West.

Contextual Value

The Westdale Theatre is prominently located on King Street West, a commercial main street in the Westdale neighbourhood of Hamilton, and is considered a local landmark due to its distinctive Art Deco-influenced design. The theatre is linked historically and physically to its surroundings as it has been an anchor in the Westdale Village community for generations, representing a central local gathering place. The theatre helps to maintain and support the social character of this predominantly walkable commercial area. It is valued by the broader film community as well due to its status as the only single-screen theatre operating in Hamilton and its screening of both mainstream and independent films.
