CITY OF HAMILTON

BY-LAW NO.

To Amend Zoning By-law No. 05-200
Respecting Lands Located at 20 Reid Avenue North, 11-17 and 41 Reid Avenue South, 22-116 Lang Street, and 2, 4, 6, 8, 10, 12, 14, 16, 18, 20, 22 and 24 Hayes Avenue, Hamilton

WHEREAS Council approved Item of Report PED18- of the Planning Committee at its meeting held on the 10th day of July 2018;

AND WHEREAS this By-law conforms with the Urban Hamilton Official Plan upon adoption of Official Plan Amendment No. .

NOW THEREFORE the Council of the City of Hamilton enacts as follows:

1. That Map No. 1092 of Schedule “A” – Zoning Maps of Zoning By-law No. 05-200, is amended by changing the zoning from the Community Institutional (I2) Zone to the Downtown Multiple Residential (D6, 696) and (D6, 696, H70) Zone, and adding lands to Zoning By-law 05-200 as Downtown Multiple Residential (D6, 696) and (D6, 696, H70) Zone, and Conservation/Hazard Land (P5) Zone for the applicable lands, the extent and boundaries of which are shown as in Schedule “A” annexed as hereto and forming of this By-law.

2. That Schedule “C”: Special Exceptions of Zoning By-law No. 05-200, is hereby amended by adding an additional special exception as follows:

“696 Within the lands zoned Downtown Multiple Residential (D6, 696) Zone, identified on Map No. 1092 of Schedule “A” – Zoning Maps and described as 20 Reid Avenue North, 11-17 and 41 Reid Avenue South, 22-116 Lang Street, and 2, 4, 6, 8, 10, 12, 14, 16, 18, 20, 22 and 24 Hayes Avenue, the following special provisions shall apply:

a) Notwithstanding Section 3: Definitions and only for the purposes of Special Exception 696 the following definitions shall apply:

i) Block Townhouse Dwelling Shall mean a building divided vertically by a common or party wall, into a minimum of three and a maximum of eight Dwelling Units fronting on a
To Amend Zoning By-law No. 05-200
Respecting Lands Located at 20 Reid Avenue North, 11-17 Reid Avenue South, 22-116 Lang Street, and 2, 4, 6, 8, 10, 12, 14, 16, 18, 20, 22 and 24 Hayes Avenue (Hamilton)

laneway or common condominium driveway, each of which having an independent entrance at grade, but shall not include a maisonette.

ii) Maisonette Dwelling

Shall mean a building used exclusively for residential purposes divided vertically into a minimum of four and a maximum of 16 back-to-back Dwelling Units, by two or more common walls which prevent internal access between units and extend from the base of the foundation to the roof line, and each Dwelling Unit having an independent entrance at grade.

iii) Stacked Townhouse Dwelling

Shall mean a building divided vertically and horizontally into a minimum of three and a maximum of 24 Dwelling Units, by common walls which prevent internal access between units, with each Dwelling Unit having one or more private entrances at grade.

b) Notwithstanding Section 4.3 b), 4.6 d) and e) 4.23 d) and in addition to Section 4.21 c) of this By-law the following shall apply:

A) Section 4.3 b) shall not apply to Blocks “2”, “4”, “4a”, “5”, “7”, and “7a” for a standard condominium.

B) Permitted Yard Encroachments

1. A porch, deck or canopy including any associated stairs may encroach into any required yard to a maximum of 1.8 metres.

2. A balcony may encroach into any required yard to a maximum of 1.8 metres, except for a required side
Appendix “C” to Report PED18158

2 5.0 square metres per dwelling unit located on Block “7a” as shown on Figure 20 of Schedule “F” – Special Figures.
To Amend Zoning By-law No. 05-200
Respecting Lands Located at 20 Reid Avenue North, 11-17 Reid Avenue South, 22-116 Lang Street, and 2, 4, 6, 8, 10, 12, 14, 16, 18, 20, 22 and 24 Hayes Avenue (Hamilton)

I) Minimum Landscaped Area 10 percent of the lot area.

J) Minimum Planting Strip Abutting a Street 3.0 metres;

K) Minimum Bicycle Parking Requirements

1. 5 Short Term Bicycle Parking Spaces shall be provided per multiple dwelling; and,

2. 0.5 Long Term Bicycle Parking spaces shall be provided per unit.

3. That Map 1092 on Schedule “A” – Zoning Maps of By-law No. 05-200, be amended the extent and boundaries of which are shown on a plan hereto annexed as Schedule “A” to this By-law by:

   a) Change in zoning from the Community Institutional (I2) Zone to the Downtown Multiple Residential (D6, 696, H70) and (D6, 696) Zone;

   b) Lands to be added to Zoning By-law 05-200 as Downtown Multiple Residential (D6, 696) Zone; and,

   c) Lands to be added to Zoning By-law 05-200 as Conservation / Hazard Lands (P5) Zone.

4. That Schedule “D” – Holding Provisions, of By-law No. 05-200, be amended by adding the additional Holding Provision as follows:

“70. Notwithstanding Section 6.6 of this By-law, within lands zoned Downtown Multiple Residential (D6,696) Zone on Map 1092 on Schedule “A” – Zoning Maps, and described as 20 Reid Avenue North (Hamilton), and further shown as Blocks “1”, “2”, and “3” on Figure 20, Schedule “F” – Special Figures, no development shall be permitted until such time as:

   (i) a signed Record of Site Condition (RSC) has been submitted to the City of Hamilton and the Ministry of the Environment and Climate Change (MOECC). This RSC must be to the satisfaction of the Director of Planning and Chief Planner, including a notice of acknowledgement of the RSC by the MOECC, and submission of the City of Hamilton’s current RSC administration fee.
To Amend Zoning By-law No. 05-200
Respecting Lands Located at 20 Reid Avenue North, 11-17 Reid Avenue South, 22-116 Lang
Street, and 2, 4, 6, 8, 10, 12, 14, 16, 18, 20, 22 and 24 Hayes Avenue (Hamilton)

5. That Schedule “F” – Special Figures, of By-law 05-200, be amended by adding
Figure 20, hereto annexed as Schedule “B” to this By-law.

6. That the Clerk is hereby authorized and directed to proceed with the giving of notice
of the passing of this By-law, in accordance with the Planning Act.

7. That this By-law No. shall come into force and be deemed to have come into
force in accordance with Subsection 34(21) of the Planning Act., either upon the
date of passage of this By-law or as provided by the said Subsection.

PASSED this __________ ___ , _____

PLANNING AND ECONOMIC DEVELOPMENT DEPARTMENT
To Amend Zoning By-law No. 05-200
Respecting Lands Located at 20 Reid Avenue North, 11-17 Reid Avenue South, 22-116 Lang Street, and 2, 4, 6, 8, 10, 12, 14, 16, 18, 20, 22 and 24 Hayes Avenue (Hamilton)
Good day

I would like to add my comments for the upcoming Rural Official Plan Amendments.

I own the land @ 1364 Barton St., between Fifty Rd and Winona Rd. I am in the Greenbelt area. Depending on how the incoming Provincial Gov't deals with Greenbelt issues, my zoning for the land becomes confusing because it is not used for agricultural purposes. Nor is it clear what I am allowed to do on my 2-acre parcel, surrounded by typical subdivision homes.

I am surrounded by new residential developments and I have all the City amenities around me. I do not wish to start farming such a small piece amongst residential homes but I don't know what I can do to move forward.

Thanks for your time.
Please contact me for more info,

Marco Marchionda
City of Hamilton pot mtg. June 19, 2018

Item 5.3; Amendment to On-Street Parking Permit Qualification Criteria (PED18139) (City Wide)

To begin; the smell of pot makes me ill! Second-hand smoke bothers me as well. I presented my concerns about cigarettes and illegal pot in City Housing buildings at the City Public Health committee meeting in January this year. My ‘thoughts on pot’ have not changed. Last week the Spec printed my anti-pot article titled ‘The PM’s pot plans will poison children’. Bill C45 and Bill C46 the impairment Bills are wrong for so many reasons. Our PM is a well-known user and his rich friends are benefiting from the legalization. When one is in public office they should not be looking to benefit from that position. These marijuana Bills are nothing to do with taking pot away from criminals.

Issues about pot/marijuana; I do not want to smell pot coming out of restaurants or stinking up a drive in the country. My parents moved my family to Greensville when I was a teen and we enjoyed living there except for when ‘El stinko’ which is what we called the local rendering plant was working overtime. In a similar vein, the City literally cannot get a lid on the smells from their plant in the North End/Beasley area. My concerns would be that the proposed greenhouses would have similar issues with smell as well as particulate matter getting into the air which is toxic. I agree with Councillor Lloyd Ferguson and his concerns about farmland being used for pot not food.

There are issues with these possible changes to zoning and bylaws. Item T from the City agenda notes they want more details about pot from the Feds and the
Province. I could not get anyone at the province to respond to my pot concerns.

Smoke Free Ontario has rules and regulations about where smoking can happen and pot should be in the same category. It may be a legal crop but no one has the right to stink out their neighbours as is proposed in Jerseyville and may be in Mt. Hope.

I do not agree with making the Airport area a pot zone. The airport area needs to be kept ‘clean’ as it were for enjoyment of the airport, CWH, fly-ins, public events at the CWH and other public events in the area. There are schools in Mt. Hope that could be affected by pot greenhouses and that is not acceptable for the children attending those schools. The Bible says ‘...all things are permissible but not all things are wise...’.

Item T from the June 19, 2018 Agenda has a note to contact the FEDs and the Prov about the pot legalization issue. I feel that no changes should be made to the existing Hamilton bylaws until the Province and Feds have a specific plan. Otherwise there will be too many potential health concerns that citizens could suffer from such as smoke, smell, particulate matter, etc. I am sure the City Tobacco office has concerns as well.

There are still illegal pot shops near at high school on Main E. near Kenilworth. Why have they not been dealt with?

Bill C45 and Bill C46 which is the impairment Bill have not said anything about smoking/using in homes or apartments. According to MADD Canada and other reputable sources there are no viable roadside sobriety
tests for drugs so there will be more issues with impaired driving. Impaired driving went up by a huge amount in Colorado after legalization.

Bill C45 is going to poison children and others who should be protected. The Feds nor the Province have decided how to protect children/tenants in apartment complexes. John Dickie who is the President of the Canadian Federation of Apartment Associations of Apartment rental society has concerns about pot as well.

*Second-hand smoke of any sort is indoor air pollution.* I have health issues due to second-hand smoke in the family home so know that second-hand smoke in the building could be a precursor to childhood asthma/allergies and pot residue stays in your system.

Mayor Fred Eisenberger has stated pot is a ‘green’ business but it is nothing like that at all. Marijuana, legal or not, creates second-hand smoke, which is a form of indoor air pollution. Nobody should have to breathe second-hand marijuana smoke at work or where they live, learn, shop, or play. The issues with the proposed greenhouses include security issues as well as the smoke and smell. How will the City ensure that the businesses involved will protect the neighbours and other bystanders?

Thank you for the opportunity to present at this meeting. I appreciate it.
ISSUES; Smoke is smoke and marijuana smoke is a form of indoor air pollution. Read ANR’s position paper, *Protecting Nonsmokers from Secondhand Marijuana Smoke* for more information. http://nosmoke.org/aboutus.php/www.sbwire.com/learnmore.php?id=845

American stats; A JAMA Pediatrics article explains the dramatic rise in children’s hospitalizations related to marijuana in Colorado since legalization. In 10 cases, the product was not in a child-resistant container; in 40 scenarios (34%) there was poor child supervision or product storage. Edible products were responsible for 51 (52%) of exposures. The report claimed that child-resistant packaging has not been as effective in reducing kids’ unintended exposure to pot as hoped.

From agenda;

Item “T” - That staff consult with the Feds and the Prov and review and report back on the revisions to the Economic Development Strategy, Official Plan Policies and Zoning Regulations with respect to medical & recreational marijuana (cannabis) production, distribution and sales and staff review the appropriate standards for recreational marijuana, using the current standards for medical marijuana as a guideline, and report back to the Planning Committee (Item 6.6 on this agenda)

12. PRIVATE AND CONFIDENTIAL
13. ADJOURNMENT
Planning Committee
Official Plan and Zoning By-law Amendment

IBI Group
The Green Organic Dutchman Ltd.
1915 Jerseyville Road, Ancaster
July 10, 2018
CURRENT OFFICIAL PLAN AND ZONING

- Existing buildings are “grandfathered”
- New buildings have cumulative cap of 2,000sq.m GFA
- No retail sales
- No outside storage
- Subject to full Site Plan Control
- Definition of “Medical Marihuana” as per Federal regs
TGOD Application

• Treated the same as any other greenhouse use
• 70% lot coverage, no building GFA cap
• No retail sales
• No outside storage
• Subject to full Site Plan Control
• Definition to remove “Medical Marihuana” reference, instead definition “pursuant to a Federal license”
Staff Report

- Existing buildings are “grandfathered”
- Permit one new greenhouse with a 13,000sq.m GFA
- New buildings have cumulative cap of 2,000sq.m GFA
- No retail sales
- No outside storage
- Site Plan Approved
- Retain definition of “Medical Marihuana” as per Federal regulations
“Land Use Planning”

- Cannabis is an agricultural crop
- Zoning should not control the ultimate consumer
- Federal licensing will control the distribution
- Zoning should only address compatibility and land use issues
Terra Waterdown Greenhouse (8 Concession 5 Road East, Waterdown)

Total Structure Area: 30,000m²

Scharringa Greenhouses (379 Concession 4 W, Waterdown)

Total Structure Area: 28,000m²
The Green Organic Dutchman Ltd.
1915 Jerseyville Road, Ancaster
July 10, 2018

PUBLIC MEETING
IBI GROUP

Beverly Greenhouses NORTH (1241 Concession 4 W, Dundas)

Total Structure Area: 30,000m²

Beverly Greenhouses SOUTH (1241 Concession 4 W, Dundas)

Total Structure Area: 24,000m²
Hortico Air Greenhouse (422 Concession 5 Road East, Waterdown)

Total Structure Area: 50,000m²

Ubbela Mushroom Farm Greenhouse (1160 Edgewood Road, Millgrove)

Total Structure Area: 25,960m²
‘Regular’ Greenhouse

Cannabis Greenhouse
Willing to accept staff report

- 20% lot coverage
- One large new greenhouse
- Existing definition for “Medical Marihuana”
Public Concerns

1. Traffic
2. Water Supply
3. Security
4. Lighting
5. Odor
6. Use of Prime Farmland for Non-food Production
1. Traffic

• Heavy construction vehicles are no longer a concern as construction is complete
• One product pick up by a cube van per day
• 40 employees
  • Car pooling and shuttle service to be provided
• 1 garbage truck pick up per week
• No public access allowed / no retail sale
• Soil replenishing deliveries – sporadic
• Site at entrance is adequate
1. Traffic continued - Entrance Street View

EXISTING ENTRANCE

EXISTING ENTRANCE
2. Water

- Recirculation, Recycle and Recapture
  - Collect and recycle all rain and storm water
  - Reuse water sources and recirculate in crop production
  - Actively manage and monitor
- Closed irrigation system
  - Water vapour is condensed and recycled
- Site Plan approval requires a monitoring program
- Water study has been peer reviewed
3. Security

• Fencing and security gates will be around the property
• Employees will only be able to access the facility via a card lock entry system
• Infra red cameras
• Motion detectors
• Mandatory employee police checks
• All leading positions require additional RCMP criminal background checks
4. Lighting

- Greenhouse will not be lit at night
  - Cannabis requires darkness at night
- Normal building security lighting will be provided
5. Odour

- Complete negative pressure building with ‘air lock’ system
- Carbon filter equipped ventilation system
6. Use of Prime Farmland for Non-food Production

- Area where TGOD greenhouse is situated is Class 5 Farmland
- Class 5 = Marginal not Prime
- Cannabis is an agricultural crop
The Green Organic Dutchman (TGOD) Hamilton Philosophy

- Hire Local
- Buy Local
- Give Local
Hire Local

1. Part time
   - 7 summer student jobs
     - Above minimum wage, lunches provided

2. Full time
   - 40+/- full time positions of various education and experience

3. Occasional
   - Hire local business to do one off jobs
     - Building sheds for live stock
     - Pounding of fence posts

Give Local

- Hamilton Food Share
  - Growing food specifically to provide free fruits, vegetables, eggs and meat for our Hamilton citizens in need
- Working with Ontario Soil & Crop Improvement Association
  - Completed our Environmental Farm Plan
  - Project Pollinator
- Hamilton Conservation Authority (HCA) Foundation
  - Rare breeds Canada
- Grand River Conservation Authority (GRCA)
Current Farming Activity in TGOD – Ancaster

- 41 acres of land planted in corn rented to a local farmer
- 2 acres in vegetable gardens
  - Growing for Food Share
- 1 acre in fruit orchard
- 4 acres in pasture
  - Chickens and goats currently on site
  - Sheep and beef cows to be added next spring
  - Purpose: meat to donate to Food Share
TGOD Facts and Future Goals

- OFA member for 3+ years
- Have Farm business number
- Have a completed Environmental Farm Plan Spring 2018
- Nutrient Management Plan to be completed Spring 2019
Conclusion

• 13,000m² Cannabis Greenhouse is an appropriate use and is in character with the surrounding rural area
• No adverse impacts
• No traffic or safety concerns
• TGOD is a model producer
July 9th, 2018

To whom it may concern;

On behalf of President Mel Switzer and the Members of the Hamilton-Wentworth Federation of Agriculture, we wish to express our support to approve an application for a zoning amendment and for the construction of the Green Organic Dutchmen’s new, legal cannabis production facility.

The Green Organic Dutchman has been a member of the Ontario Federation of Agriculture for over four years and has been a “model citizen” in terms of opening their doors to those interested in learning about cannabis production or their own on-farm methods. Their future production plans will require a greenhouse that is greater than the 2000 square meter restriction currently imposed by the City of Hamilton’s outdated By-law for medical marijuana production.

The Ontario Federation of Agriculture, along with OMAFRA, Agri-Food Canada and the Canada Revenue Agency have recognized the future production of growing and processing legalized cannabis as an agricultural commodity. Therefore, HWFA as a “grassroots” organization of the OFA, also acknowledges the process of growing cannabis as part of the agricultural industry.

Further to this, the HWFA with the guidance of Drew Spoelstra, OFA’s Zone 5 Director, Vice-Chair of HWFA and Chairperson for the City of Hamilton’s Ag & Rural Affairs Committee, have provided opportunities to educate those interested in learning more about the cannabis growing process. We have listened to concerns, allowed those that wished to voice their concerns to do so and have had full dialogue on this matter.

All appropriate channels have followed due process, resulting in the consistent messaging of cannabis being considered an agricultural commodity.

We thank you for your attention and the consideration of this matter.

Regards,

Mel Switzer
President, HWFA
Dear Committee Members:

Re: The Green Organic Dutchman Holdings Ltd.
Official Plan Amendment Application
Lands located at 1915, 1995 and 1997 Jerseyville Road, Ancaster

We are the solicitors for The Green Organic Dutchman ("TGOD").

We are writing to request that the Planning Committee (the "Committee") adopt the recommendations of staff in report no. PED18118, dated June 5, 2018, respecting TGOD’s applications for an amendment to the Rural Hamilton Official Plan and the City of Hamilton Zoning By-law No. 05-200 (the "Applications") for TGOD’s lands located at 1915, 1995 and 1997 Jerseyville Road West, Ancaster (the "Site").

TGOD is a federally licensed cannabis producer of farm grown, organic cannabis. TGOD grows its high quality organic cannabis in small batches, using craft growing, all natural and organic principles, without the use of pesticides.

Since 2016, TGOD has operated a medical cannabis growing and production facility with a floor area of approximately 575 square metres at the Site without incident or complaint. TGOD wishes to expand its operations, including the development of a new greenhouse (the "Proposed Development"). The Proposed Development will also include a greenhouse with a saw toothed glass roof design, a large rain water reservoir for which all roof water will be collected and used as part of the growing operations, associated parking and vehicular loading. The Proposed Development is also designed with a drip irrigation system and sophisticated climate control system as well as a top of the line grow light system, that enables a grower to make premium crops in any traditional potted plant production.

The enclosed supplementary consultant reports support a lot coverage of 70% for any greenhouse on the Site, a much larger proposal than what is being recommended by staff on the Applications. Copies of these supplementary consultant reports have also been provided to the City’s Planning Department. Moreover, the recommendations of staff in City-wide staff report
No. C1-18-D, dated June 19, 2018 (the “City-Wide Staff Report”), provide further support for a much larger proposal, as staff recommended allowing medical marihuana growing and harvesting facilities with a maximum total gross floor area for all buildings and structures of 90,000 square metres or 70% lot coverage (whichever is the lesser). Considering the foregoing, the recommendations of staff on TGOD’s site-specific Applications are very conservative.

The Applications were last considered by the Committee on June 5, 2018 wherein the Committee deferred making a decision on the Applications until after the City-Wide Staff Report was considered. Despite this last meeting, the Committee has now resolved to consider applications on a site by site basis. TGOD is prepared to accept the recommendations of staff for a smaller expansion and requests that the Applications be approved. Representatives of TGOD will be in attendance on July 10, 2018 to answer any questions you may have.

Please do not hesitate to contact me should you have any questions or concerns.

Yours truly,

Cassels Brock & Blackwell LLP

Signe Leisk

Hamilton, ON, L0R 1R0

COMPLETED AND FUTURE NATURAL HERITAGE ASSESSMENTS FOR 1915 JERSEYVILLE ROAD WEST  
(PART OF LOT 24, CONCESSION 2) GEOGRAPHIC TOWNSHIP OF ANCASTER, NOW CITY OF HAMILTON

Mr. Cernovitch:

Golder and the G logo are trademarks of Golder Associates Corporation
of the site, surrounding meadow marsh, as well as the significant woodland along the road allowance to the east of the site. The ESA would not be directly disturbed by the development.

The site was determined to have low potential for species at risk (SAR) due to the predominance of disturbed land cover. Two SAR were, however, observed on site (barn swallow, *Hirundo rustica*, and monarch, *Danaus plexippus*) and a third (butternut, *Juglans cinerea*) was observed in the study area. An old barn on the site was removed in September 2017 following the Ministry of Natural Resources and Forestry registration procedure due to confirmed nesting activity by barn swallows and compensation habitat was developed in April 2018 as required by Ontario Regulation 242/08 under the *Endangered Species Act, 2007*. Monitoring of the compensation habitat is currently underway. It was determined that habitat for monarch is not limited in the study area and broader region and the butternut trees would not be impacted by the development. The overall conclusion of the EIS was that with the implementation of appropriate mitigation (detailed in Section 8.0 of the EIS report), no residual negative impacts on the significant natural features and functions on the site and in the study area were anticipated on account of the development.

The final EIS report was submitted to TGOD in October 2017. Following review by the City of Hamilton and Grand River Conservation Authority (GRCA), Golder addressed agency comments. No commentary was made by either agency regarding the use for the property or the appropriate lot coverage. The revised EIS report and comment responses were submitted to TGOD in December 2017. It is Golder’s understanding that TGOD has received site plan approval, which indicates the revised EIS and comment responses were deemed satisfactory by the reviewing agencies.

**Future Development**

If future expansion is planned within the larger property boundary, the land outside the boundary of the site will require an EIS evaluation prior to development as a standard condition of site plan approval under the *Planning Act*. Through the EIS, any natural heritage regulatory constraints that may affect development limits on the expansion site will be identified. Recommended mitigation measures to minimize potential impacts to the natural features in the study area defined for the expansion site, and the need for any permits or additional requirements, if necessary will also be identified.

Preliminary desktop review of the expansion site indicates most of the remaining property is in agricultural use. Depending on the crop type, agricultural lands may provide habitat for grassland birds. Breeding bird surveys will be scoped as part of the EIS. Provincial mapping identifies a linear woodland feature in the north-central area of the property that likely was planted or retained as a wind break. This woodland has not been identified as significant in the Rural Hamilton Official Plan, but its potential for bat habitat and presence of butternut and other SAR plants will require evaluation. A pond feature at the north end of the woodland is visible in aerial imagery, though not depicted on provincial mapping. Turtle and amphibian surveys will be scoped as part of the EIS. The eastern portion of the property is within the regulation limit of the adjacent PSW. As such, it will need to be demonstrated through the EIS that development within the regulation limit will not be detrimental to the PSW, and a permit will be required from the GRCA to proceed with development within the regulation limit.

At this preliminary stage, there do not appear to be any significant natural heritage features present on the property that would altogether preclude development once appropriate mitigation measures are implemented. There is potential that natural heritage features on the site or in the study area may dictate site plan design or the building envelope available for development. However, this conclusion cannot be confirmed without completing an EIS, which will be conducted at the site plan stage.
If additional information or commentary is required, please contact the undersigned.

Sincerely,

Golder Associates Ltd.

The Green Organic Dutchman Holdings Ltd.
PO Box 81025, Fiddler’s Green
Ancaster, ON  L9G 4X1

Attention: Marc Cernovitch

Dear Sir

Subject: Addendum Letter Regarding Development Restrictions
1915 Jerseyville Road Facility

WSP Canada Inc. (WSP) was retained by The Green Organic Dutchman Holdings Ltd. (TGOD) to provide various environmental consulting services related to their proposed greenhouse operations at 1915 Jerseyville Road West, Ancaster, Ontario (Site). The currently approved Site Plan development includes the construction of two buildings with a total building footprint of approximately 14,600 m²; however, TGOD may consider future expansion to the facility. In the case that additional development is proposed at the Site in the future, TGOD will be required to obtain necessary planning approvals for the development.

BACKGROUND

We understand that the currently-approved zoning for the Site by the City of Hamilton permits a maximum lot coverage of 20% and restricts individual buildings to a maximum area of 2,000 m². We understand that TGOD would like to amend these restrictions to allow for potential future development or alterations to the facility operation. In that case, additional studies under the Planning Act would be required prior to approval of any additional development beyond that which is currently approved. These studies are typical of development applications and the studies normally occur at the Site Plan stage.

We understand that under the current City of Hamilton zoning allowances, a greenhouse facility is permitted to a maximum lot coverage of 70%. Based on our studies to date, WSP is unaware of any technical reason to limit the maximum lot coverage to less than 70%.

WSP STUDIES COMPLETED FOR SITE PLAN APPROVED DEVELOPMENT

WSP was retained by TGOD to provide environmental consulting services, including geotechnical, hydrogeological and surface water services. A brief description of the studies that WSP have completed to date, as well a brief discussion regarding any future expansion to the property in terms of that area of study, is provided below.
GEOTECHNICAL CONSIDERATIONS

WSP conducted a geotechnical investigation for the currently-approved development and the results were presented in the Supplemental Geotechnical Investigation report (August 15, 2017). The investigation included the advancement of boreholes within the proposed development area to determine the design requirements for the buildings, ponds and parking/roadway areas. Acceptable soil conditions to accommodate the building, roads and infrastructure were encountered across the Site. Any proposed future expansion would require an additional focused geotechnical investigation be completed to assess the subsurface conditions in other areas of the Site.

Based on the geotechnical investigation completed, there does not appear to be any geotechnical reason why the property would not be able to physically support a maximum lot coverage of 70%.

A copy of the geotechnical report was provided to the City of Hamilton.

ON-SITE WASTEWATER TREATMENT CONSIDERATIONS

WSP completed the design for the on-site waste water treatment (septic) system for the currently-approved facility, which is presented in our OBC Sewage System Design Report (November 28, 2017). The system was designed and approved for the domestic sewage flows from the employees at the Site, since no process wastewater from the greenhouse is designed to enter the sewage system. The current septic system was designed for a total of 90 employees. The required septic field for the current facility is approximately 1/10 ha. There is likely adequate space to accommodate significantly larger wastewater flows given that the total site area exceeds 34 ha.

Any future development at the Site would require further sewage system design calculations and studies to be completed. The results of the septic design report completed by WSP in 2017 do not suggest any reason why the property could not sufficiently process additional sewage which may be created by future development at the Site. We note that at flows greater than 10,000 L/day, the system is designed and approved under a Ministry of Environment and Climate Change process as opposed to the Ontario Building Code (OBC) process for the current system.

A copy of the OBC Sewage System Design Report (November 28, 2017) was provided to the City of Hamilton.

HYDROGEOLOGICAL CONSIDERATIONS

WSP completed a Hydrogeological Study (Phase 1) in 2017 on the existing dug well on the property. The results of the study found that the dug well may be able to provide a water supply to a portion of the development, but recommended that an additional water supply well be installed at the Site. A new bedrock supply well was drilled and WSP completed hydraulic testing of the new well. The results of the testing were presented in a Hydrogeological Study (Phase 3), prepared by WSP in 2017. The study found that the new well can supply the currently-approved development with a sufficient volume of water for operation. The study also found that impacts from the groundwater withdrawal for the Site will not negatively impact surrounding supply wells.

The completed hydrogeological study report were completed to ensure that the bedrock supply well has sufficient supply to meet the currently-approved facility’s water demands and that pumping the required volume of water from the well will not negatively impact the supply to any surrounding water wells. Future development at the Site will require additional water supply, which may require additional wells to be drilled at the Site, or an alternate water source to be determined. As presented in the Hydrogeological Report, a total of 40,792 L was pumped from the bedrock well over 24 hours and the observed drawdown at the bedrock well after 24 hours of pumping was 4.95 m, which represented 11% of available drawdown. The conservatively calculated
well yield was estimated to be 60,200 L/day, which was much greater than the maximum estimated water requirements for the Site of 40,000 L/day. As such, the hydrogeological studies completed indicate that there is additional capacity available in the current bedrock well beyond the currently-approved facility’s requirements. We note that at daily water taking volumes of greater than 50,000 L/day, the facility will require a Permit to Take Water issued by the Ministry of the Environment and Climate Change. Additional hydrogeological studies will be required to be conducted on the existing bedrock well, or on additional new wells, to support future development to determine an appropriate water source to meet the needs of the future development. These would be completed at Site Plan stage. At this time, we do not see any hydrogeological reason to limit the Site development area or building sizes.

The hydrogeological reports were provided to the City of Hamilton for review. WSP review comments from Cambium Inc., the City of Hamilton’s hydrogeological consultant, dated October 12, 2017 and December 18, 2017 and WSP provided a response letter to the December 2017 comments, dated January 12, 2018. All review comments received from the City of Hamilton as part of the planning process have, therefore, been addressed to the City’s satisfaction. In addition, we note that the previous technical comments from the City of Hamilton (Cambium Inc.) are not related to lot coverage or building size.

SURFACE WATER DISCHARGE CONSIDERATIONS

WSP prepared a Surface Water Assessment Study (October 2017) as a pre-consultation document prior to an application for an Environmental Compliance Approval (ECA) from the Ministry of the Environment and Climate Change (MOECC). The ECA will be required to obtain approval to discharge process water into a surface water receiver which flows across the Site (Big Creek). The facility will obtain irrigation water for the greenhouse from a deep bedrock supply well. The well water will be treated with a reverse-osmosis system prior to use for irrigation. The discharge water from the reverse-osmosis system is proposed to be discharged to Big Creek.

The ECA application process is currently ongoing. The preliminary report completed in October 2017 indicates that Big Creek has sufficient assimilative capacity to accept the discharge from the Site. However, it is possible that if future greenhouse buildings were constructed at the Site, the creek may not have the capacity to handle additional discharge. As such, an alternative discharge location may be required for future Site expansion. Alternatives, including off-site disposal at a licensed facility, would be investigated in future studies at the Site Plan stage to support expansion. Including offsite disposal at a licensed facility. At this time, we do not see any surface water discharge related reason to limit the Site development area or building sizes.

A copy of the Surface Water Assessment Study report was provided to the MOECC for their review. A pre-consultation meeting was held in November 2017. During the meeting, comments and further action was agreed upon by all parties and additional longer term testing is ongoing. The formal application for the ECA is anticipated to be submitted in July 2018. With this additional length of the study period, no concerns are anticipated to complete the ECA approvals process.

SUMMARY

WSP has completed several environmental engineering studies in support of the development of the greenhouse facility at the Site, including geotechnical, hydrogeological and surface water studies. The studies and designs were completed for the currently-approved Site Plan development, including the construction of two (2) buildings, with a total building footprint of approximately 14,600 m². The studies completed are typical studies required for greenhouse development application. Any comments received on the studies by the City were addressed and there are no outstanding concerns. No comments regarding these studies which were received from the City were related to lot coverage or building size.
Any future expansion proposed at the Site would require that the engineering studies previously conducted be redone or revised for the proposed development. These studies are normally completed at the Site Plan stage. We do not see any technical reason why the property cannot support a maximum lot coverage of 70%. From a technical perspective, the geotechnical, hydrogeological and surface water requirements of the marijuana greenhouse facility are the same as any other greenhouse facility, and it should be treated as such.

We trust this provides the information you require.

Yours truly,
WSP Canada Inc.

Mr. Marc Cernovitch  
Green Organic Dutchman Ltd.  
1915 Jerseyville Road  
Jerseyville, ON L0R 1R0

Dear Mr. Cernovitch:

1915 JERSEYVILLE ROAD, JERSEYVILLE, ON  
STORMWATER MANAGEMENT

The stormwater management design for the Phase 1 and Phase 2 development accounted for a proposed conditions impervious coverage of 81.5 percent (summarized in Table 2 in the Stormwater Management Brief dated November 16, 2017). The two stormwater ponds were sized based on the proposed impervious levels.

We responded to all comments received from the review agencies, and no comments were received related to lot coverage or building size. Approval of the Stormwater Management Report was obtained from the Grand River Conservation Authority (December 19, 2017) and from the City of Hamilton (April 3, 2018).

Any future development or expansion would be required to follow similar design criteria as those implemented for the Phase 1 and Phase 2 development. The design requirements would include:

- Identification of an appropriate stormwater outlet;
- Stormwater management for quantity control would be required to control proposed conditions peak flows to existing conditions levels for the 5 year and 100 year storm events;
- Stormwater management for quality control would be required to an Enhanced Protection Level as per MOECC standards;
- A water balance calculation would be required for existing and proposed conditions; and
- A Geotechnical Study and a Hydrogeology Study would be need to be provided to identify on-site soil and groundwater conditions to facilitate the stormwater management analysis and design.

The analyses and studies listed above would be completed at the Site Plan stage. For the current and any future developments, there is no technical reason that a seventy percent building coverage could not be accommodated from a stormwater management perspective. Stormwater management facilities would need to be appropriately designed to accommodate such a building coverage.

Additionally, the construction of a greenhouse building is no different than other building types, and stormwater management facilities must be designed to provide the storage volumes and controls necessary to meet the criteria and targets mandated by the review agencies.
We trust the foregoing is satisfactory. If you require additional information please contact the undersigned.

Yours truly

IBI Group

Re: Designation of 679 Main St. East and 85 Holton Avenue South under Part IV of the Ontario Heritage Act  
June 27, 2018

Mr. Mayor, and City Councillors:

My name is Daniel Peace and my family were members of St. Giles Church for 5 generations. The discussions regarding the founding of St. Giles Church took place around the table in my great-grandfather’s dining room.

From 1908 until 2014 St Giles’ ministry was creative and energetic, and made a significant impact on its neighbourhood and the city. These include, as a small sample:

- Early in the 20th century, St Giles was instrumental in welcoming and supporting refugees from the Armenian Genocide. Many of those families were welcomed into St Giles, and in 1980, a number of those families supported the St. Giles congregation in its sponsoring of four families of ‘Boat People’ from Laos.
- In 1925, St Giles was the only Presbyterian Church in Hamilton to join the United Church of Canada. As the city grew, the St. Giles congregation played a significant role in supporting new congregations starting up on the mountain, as well as the founding and development of Wesley Centre, now known as Wesley Urban Ministries.
- Throughout its ministry, the church offered many community programs to the neighbourhood: Scouting, Guiding, AA, sports, music, recreational programs for folks living in the many residential care facilities in the neighbourhood, the establishment of the Friendship Centre network, assisting folk with schizophrenia, strong leadership in the Sherman Hub, and many, many others.

It is important for each of you to know that the knowledge, the skills, and, most importantly, the values taught, practised, and lived out at St Giles United Church live on, and prosper, at New Vision United Church, currently worshipping and
growing at the much more significant heritage site at 24 Main St. West, formerly Centenary United Church. The true ongoing heritage of St. Giles United Church is witnessed daily in the innovative and affirming congregation at New Vision. The church is the people, not the buildings.

In our deliberations over how to deal with our building at Main and Holton, we used an ‘Evaluate the Need’ approach:

- There is **no** need for the building as a church. The people in the neighbourhood have not been attending for years. When the Congregation decided to embrace the New Vision opportunity, over 70% of the St. Giles congregation lived outside Ward 3. Other churches looking for a church building have rejected the St Giles building because of its state of disrepair, and its massive operating costs.

- There is **no** need for the existing building as housing. The building is not structurally or architecturally suitable for conversion into the housing that would provided sufficient density to meet the needs and mid-range rental expectations of the City. Most churches that are converted to condos etc. are aimed at the high-end market. It is our religious view that a former place of worship should not be converted into high-end housing for the wealthy.

- There is **no** need for the building as an example of noteworthy architecture, as there are 10 other buildings designed by Stewart and Witton throughout Hamilton.

We support a ‘Win-Win” approach to the opportunity that the empty building that once housed the St. Giles congregation provides:

- The City of Hamilton wins on two fronts. First, much needed mid-range rental housing, designed to fit into the existing community, will be created in Ward 3. Second, the restoration of the New Vision building includes the creation of the ‘Music Hall’, a concert and meeting venue seating 700 to 1100, filling a current void in the inventory of performance halls in Hamilton. A few decades ago we had 17 such venues, now we have potentially one – at New Vision.

- New Vision United Church wins, as the funds received from the creation of the housing at Main and Holton will be used to finance the major restoration of the much more significant heritage building at 24 Main Street West, the 150-year-old former Centenary United Church. We cannot restore and
maintain these two buildings, and we are choosing to restore the former Centenary site.

- The United Church of Canada wins, as the religious freedom of its congregations to manage their assets for the greater good of its members, and the communities in which it lives, is confirmed.

Our proposals for the former St. Giles’ building have been unanimously supported by the Hamilton Presbytery of the United Church of Canada.

We realize that the City Heritage Committee is doing its job in determining whether a building is designated on the architectural criteria defined in the narrow and flawed provincial legislation; however, the social impact of designating the property at Holton and Main will cause the loss of significant opportunities. We at New Vision, the owners of both properties, are counting on our City Council to see clearly these ‘big picture’ opportunities: mid-range needed housing in Ward 3, and the restoration of New Vision’s heritage property at 24 Main Street West, including a city-wide opportunity for the Music Hall.

We ask you to support these opportunities and vote to defeat the motion designating the Holton and Main property as ‘heritage.’

The decision to see the former St. Giles’ building is painful to me, and to many others whose lives and families have grown up in the neighbourhood. We wish that things didn’t have to end up this way, but sometime we just have to do the right thing, for the good of the City, with new housing and the development of the Music Hall, and to support the efforts of the growing, affirmative, diverse congregation of New Vision United Church at Main and MacNab.

Thank you all for your consideration,

Daniel G. Peace
Chair, Board of Trustees
New Vision United Church
THESE GAVE THEIR LIVES FOR HOME AND COUNTRY IN THE GREAT WAR

1914  1918

RUSSELL Bews  ALEX CARRINGTON  J P LOVE
TOM G MARTIN  ALEX M'FARLANE  W T SAWLE
W W STEWART  GEORGE SWEET  CLIFFORD WOOLEY
The former St. Giles Church is rich in history, and many members of this congregation over the years have left considerable amount of money in their wills to support, and preserve this church. Although many of the founding members are no longer here, their descendants consider this building to be a significant part of their past.

Without any apparent consideration by the property owners, a demolition permit application was submitted for this site. Some thought should also have been given for the commemorative plaque on a cairn on Holton Ave. South side. This was installed in memory of the church members that lost their lives in the Great War between 1914-1918. Another commemorative plaque of fallen soldiers in the Second World War is displayed in the Memorial Chapel. These were all members of St. Giles Church.

This historical structure, and its contents, should be preserved and designated as a Heritage Building. It is indeed a beautiful landmark that would be enjoyed and appreciated by many in the City of Hamilton.

If you could pass this information on to the council members for their deliberation, I would really appreciate it.

Best Regards,

Marie Sharp
