

2007 Petition

576 Signatures opposing the development plans on the Brow lands

May 7, 2007

Petition

Ma Ke Cui

This petition is in response to the recent information regarding the plans for developing a Chedoke Brow lands located along the Niagara escarpment.

The land proposed for development was bought by Deanlee Management from Chedoke Health Corporation and stretches along Sanatorium Road north of Scenic Drive on the west Mountain.

This land is one of the few remaining pristine areas in the city, located in an environmentally sensitive area and adjacent to a well established single family homes residential area.

The developer plans were presented in a few public meetings and the proposal is to build townhouses as well as several 12 to 14 storey apartment buildings.

As a concerned citizen of Hamilton and residents of the neighborhood we strongly oppose such plans for the following reasons:

1. The land is located along the Niagara escarpment and such development will strongly impact the environment. The area is a hive of wild animals in the night and during the day time is bustling with people waking the trails, biking or enjoying the views of Lake Ontario and Coots Paradise.
2. The land contains many secular trees, an orchard and a creek that flows down into Lake Ontario. A row of townhouses and high rise buildings will destroy the natural beauty of the place, will impact the free movement of animals and people in the area and will destroy one of the few remaining naturally wooded lots of the city.
3. The developer plans will increase the number of locative units by 1500 to 2000 at an average cost of 300 000 to 400 000. Such a development is not targeting retired people as the developer claims, but active families with one or two cars per family. This will add 3000 to 4000 cars on a street that cannot sustain such an increase in the traffic volume. Mountain Access roads and Lincoln Alexander exits to 403 are already congested and adding such a high number of new cars will create complete chaos and horrendous traffic jams.

4. This is a residential area with single family homes. The residents are spending a significant amount of human and financial resources to maintain the quality of the properties. There is not one neglected home in the neighborhood. The proposed development will reduce the value of the properties and will have a strong negative impact on the neighborhood. We agree with local government initiative to increase urban building density. There are many run down areas in the city and the local government should encourage the developers to build new buildings in those areas before they start destroying good neighborhoods and environmentally sensitive locations.
5. There are a few buildings located on this land that have historical and architectural value. In our opinion the land in question should be preserved as a recreational area restoring the existing buildings for public use (libraries, museum, and community center). Any new development should not change the neighborhood character which is that of single family homes.

We have already contacted the Niagara Escarpment Association and the Suzuki Foundation and we are determined to fight to save this piece of land for the common benefit of the citizens of Hamilton.

Respectfully,
 Concerned residents of a beautiful neighborhood of the great city of Hamilton
