Subject: Industrial Wind Turbines

To the Mayor and Council Members of Hamilton

As one Ontario citizen who is directly affected by the negative impact of Industrial Wind Turbines, I implore you to take a firm stand against the creation of "Wind farms" in your area for some of the following reasons:

- Negative health effects on nearby residents*
- Negative impact on wild life*
- Inefficiency*
- Pollution to the Earth's environment in their manufacture*
- Only minimal and temporary job creation*
- Disfiguring the landscape*
- Enriching foreign corporations*
- Short term and costly solution to electricity production*
- Investments should be used for development of better development of electricity production*
- Investments should be used to create an efficient and user-friendly public transit system*

Thank you for listening
