Subject: Decision for the Glover Rd Cul de sac

Dear Brenda,

In response to your recent letter sent to Glover Road residents. With the city staff recommending a road narrowing instead of the cul de sac we are writing to propose a cul de sac at the end of Glover Road at Dickenson. This would eliminate some of the issues against the cul de sac. This cul de sac at Dickenson will not change the EMS response times. The neighbourhood signed a petition in favour of a cul de sac and had a 98% majority. We have children in our neighbourhood (and in our home) who cannot play in our front yards or ride their bikes down the road without their safety being a concern. This neighbourhood has been very cooperative with all of the many changes, why can the city not work with us to help give us back a portion of what was taken from us. Our quiet rural neighbourhood has been turned into a busy industrial thoroughway and the only way to have the neighbourhood we previously enjoyed back would be to approve the cul de sac at Dickenson. This is the best option to put a cul de sac at Dickenson. To us, we are very frustrated that we proposed this road closure at Dickenson at a meeting months ago and no action has been taken. THIS IS THE BEST OPTION, to close Glover Road at Dickenson, this would not change access to the city, will not change EMS response times. This option will provide the residents on Glover Road our quiet, safe comfortable neighbourhood we previously enjoyed back.
