Subject: Strathcona secondary plan

Our understanding is that a large number of homes in the Strathcona and Inchbury at York Blvd. areas, particularly the area added in the secondary plan. could be bought up and converted to high density residential use.

We would like to stress how important we feel is the necessity to preserve these historical and well cared for streets in the Strathcona neighbourhood.

This area has seen a solid community development happening in the last few years which can only be good thing for the city. Our hope is that any high density development will not include existing neighbourhood homes on the south side of York St. A city's character is expressed most eloquently through it's neighbourhoods. We would like to see the historical character of this neighbourhood preserved and these Strathcona homes remains intact.

Kind regards,

Diane and Barney Daniels
