Hello

What the hell is going on with this frigging city????????????????? We are allowing 259 condo units to be built on James St. and only 98 parking spots. I live near there and we are going to be inundated with street parking which there are none. The builders and owners have to change the 33% parking to 80 %---- If they don't like it tell them to go back to the drawing board. This city is getting too lenient with builders and owners. They are going make millions on this development under the guise they are helping the city. They will not be helping the city with the congestion of downtown which is getting worse. Tell them to ship up or ship out ---build more parking spaces . this city has to take a Tough stand against these owners They will roughshod all over us to make a buck'  
As Ty Domi says -- "Stick up to the big guys"
