

Subject: Cecil Kalyn Municipal Council Support Resolution
RE: 97 5th Concession East, Former Township of East Flamborough, Ward 15

Dear,

Mayor Fred Eisenberger and Members of City Council,

I am preparing an application to the Independent Electricity System Operator (IESO -former OPA) Ontario Power Authority. The application that I am preparing is to install and operate a 250kw (KiloWatt) electricity generator.

The application is to have a bio mass as fuel to produce the energy to operate the system. The bio mass will consist of waste saw dust from a lumber mill in Northern Ontario. The waste saw dust will be pelletized and used as fuel.

In order to qualify for a contract from the IESO (Independent Electricity Systems Operator) we require points as laid out in the IESO rules. One of the ways to obtain "Points" is to qualify to submit an application, we require Municipal Council Support Resolution. This Municipal Council Support Resolution will give us two (2) "Points" and will qualify us to submit the application. We respectfully request your support in this regard.

Time is of the essence, in that the window of opportunity to submit the application opens on Monday, July 13th, 2015 and closes on Monday, July 27th, 2015. It is my understanding that the applications are date and time stamped with a quota for the number of kilowatts that will be approved in this window of opportunity. Therefore, it is most critical for us to have our application hand delivered first thing in the AM of Monday, July 13th, 2015.

We understand that time is extremely short for you and your council members to accommodate our request. However, the rules for applying for a contract to the IESO were only published one week ago, otherwise we would have requested your Municipal Council Support Resolution sooner.

We respectfully request your cooperation and trust that you will endeavour to accommodate our requirements.

Yours Truly,

Cecil Kalyn
