Cam, I just finished reading your staff report on this property. All I can say, on behalf of the neighbourhood, is thank you. The report, in my view, really addresses the issues faced by our neighbourhood and seriously outlines the challenges. It of course also recognizes policy and the history of the development with this property. It also gives valuable information on what we see every day – that is using the philosophy of “break the law and ask for forgiveness later if caught”.

Thank you for the care and attention you have given this report. Whatever the result down the road, in my view you have done an excellent job.
