Subject: LRT

My name is Kit Staley and I live at just off of Upper Sherman.
I am concerned that the proposed LRT project will be seen as the only transit project the city will under go and not take into account the people on the mountain.
When I hear inner city councilors trying to deflect the need to widen the Red Hill and Linc by saying tolls should be considered on these roads, I am concerned that the transportation needs of the people on the mountain will be neglected
If LRT is important to downtown then the Linc and Red Hill expressways are just as important to people on the mountain. People that will not benefit from the LRT.
Please have this email presented to the next committee meeting and have a person of authority respond to me.
Thank you

Kit Staley
