Management at Brock University in St. Catharine's. My daughter can confirm this.

She is in charge in Human Resources at Georgian College, in Barry.

Participate in a conference of Ontario Municipalities regarding the diversion of waste

From landfills, setting targets for the Future, in Niagara Falls.

Seminar by the Ontario Government at Living With Lakes. Laurentian University about

The effect of Climate Change on our Province, including water levels in lake

Simcoe, Huron, Superior, Earie and Ontario Lakes, .

Participated in a public forum and discussion in 2014 at the Steelworkers Hall in Sudbury

Conducted by the Ministry of the environment, regarding ideas and suggestions for the

Future of the Province.

Attended the International Conference on re-greening of mine tailings and reforestation

Of clear-cutting forests, and contacted the rep. of Walker Environmental, to sell

And incorporate their biomass products into organic soil, I took part in an expedition

To view the present state of mine tailings at the site of Vale operations. The conference was conducted at The campus of Laurentian University, and had a discussion with prof

Peter Beckett, who is in charge of re-greening. I also contacted the Norwegian Delegation about their efforts and their hydro-electric projects. Their country ,s geography is vey similar

To ours, and they invest into green projects through the Norwegian Pension Fund.

**LEADERSHIP** | A leader must have the ability to recognize, what is important and what is not , at any given moment., to engage the public and inspired them to an action, to set an example, to face the

Challenges with an open mind to find the reason to survive, but all this must be delivered in

An orderly fashion, step by step, No revolutions but resolutions. and no violence.

I have started a charity account to fundraise money to invest in green energy, People do not like to pay taxes, but they love their children, and want to make sure that they have a future.
