Good morning. My wife and I reside at 11 Fair St, just around the corner from the above-referenced development. Overflow parking from a new 35 unit development will be felt by neighborhoods such as ours. As it is now -- with 10 single detached homes on each side of the north end of Fair St -- there is already competition for street parking. This new development will aggravate the parking situation as we experience it now. What is being done to ensure that street parking congestion will not be compounded?!

Regards,

Herman Schutten
