

ONTARIO 150 COMMUNITY CAPITAL PROGRAM

SD: Strongly Disagree - N: Neutral - SA: Strongly Agree

Weight	Assessment Area	Score					Assessment questions and supporting questions	Assessment Consideration
		SD		N		SA		
20%	Strategy	-2	-1	0	1	2	The Strategy is appropriate given the opportunity and goals	
							What is the idea, challenge or opportunity that the organization will explore in this project?	The idea, challenge, or opportunity being explored is evidence-based and well understood.
							What is the need in the community that this project will address? How pressing is the need? How will they address that need through the initiative?	The type, level, and urgency of the community need is described. The way the project will impact the community is clear (e.g. scope or depth). There is a link between the community need and how the project will address it.
							Geographically, where will the primary impact of this project be made?	Consider the application in the broader context of Ontario150 funding - will this investment go to a geographic area that is already relatively well served?
20%	Process	-2	-1	0	1	2	The processes to be employed are appropriate	
							Did they provide a brief description of the activities that they will perform to complete this project?	The application must show a reasonable timeline and describe links between the project activities and the project objective.
20%	People	-2	-1	0	1	2	The team is qualified to lead/steward this endeavor.	
							Did they provide a description of the core team members leading and/or supporting the project?	The team has the skills, knowledge or competencies needed to lead/steward the endeavour.
20%	Infrastructure & Equipment	-2	-1	0	1	2	The infrastructure design and/or equipment selected is appropriate	
							Did they upload up to five (5) supporting pictures or diagrams, or provide a link to pictures, to provide greater explanation of their funding needs? Did they include a short description of each picture?	The infrastructure design and/or equipment selected is appropriate
20%	Metrics	-2	-1	0	1	2	The cost per output is appropriate
