Re: Public Alley Way, Dundas

To the City Clerk,

The public laneway has been a part of Dundas since the original street layout of Dundas and additionally sits inside Dundas's only historic designated district. Throughout this time it has only served as a unique feature and welcome transition for pedestrians from the typical street scape found throughout most cities. Never an issue or concern. Now this unique and welcome street scape is in danger of being permanently reversed. With so much opposition and expressed concern from Dundas constituents, It would seem prudent to take a moment to reassess the process in how the city deals with alleyways. This is clearly an opportunity to seek a new strategy in how to move forward and shape our community for the future. I suggest before you make irreversible decisions, we get together and partner in a process that helps guide decision making that better reflects the desires and vision for our town. Please delay this sale, and allow for a process that better represents the peoples desires and concerns of our community.

Sincerely,

Graham Thomas
