Dear Honourable Mayor and City Council

I've been advised by my neighbourhood association that a 4 way stop is going in at the corner of my street (Green and Frances). I live a stone's throw away from this intersection & my initial reaction was: Why do we need to put a stop sign at every possible place and make driving such a pain. There isn't really any traffic there at all that would demand it. What are our councillor's reasons for needing this? Being part of that specific neighbourhood, I can assure you I have a great understanding of our local traffic.

I find it interesting how the residents in affected areas are basically left to search and seek out the info of their area on their own. If changes are happening or proposed, why not a sign put up about a meeting to discuss it or flyers in our mail boxes?

Brutal!
