Please note that I am totally opposed to this ill conceived idea. If the purchaser even spent one afternoon sitting at that intersection they would see the folly of their plans .

I believe this plan has been a “backroom” concoction: two years ago all the trees were cleared off this property without prior permission— then a small base information meeting — now this.

As a 34 year resident of Ancaster , we have seen a great deal of change for our community , but this does nothing to make Ancaster a better place to live.
