To Whom it may concern,

I have read articles in the Hamilton Spectator recently about the building project, Londo towers, one 40 stories, one 30 stories, at the corner where CHCH T.V. was located, at Hunter St. West, and Caroline St. South.

I noticed no one seems to have mentioned the VIA rail tunnel on Hunter St. West which is very close to where this building condos project is being proposed.

I would like to mention that this condo project being proposed, could very likely have a major effect on the VIA rail tunnel, which is well over 100 years old, and that the railway is private property owned by VIA rail. (I assume that the train tracks are actually owned by VIA rail.

This adverse affect could be very dangerous and very costly to repair.

Thank you for your consideration in this matter.
