The Mayor’s Blue Ribbon Task Force on Workforce Development
Purpose **Statement**

On February 13th, 2017, Hamilton City Council approved five recommendations brought forward by the Mayor’s Blue Ribbon Task Force (BRTF) on Skills Development that will help to develop and enhance Hamilton’s workforce.

This report provides an overview of each of the approved recommendations along with a list of associated actions and their status of implementation. In addition, each section provides a highlight of at least one of the significant projects that have been implemented since the last Report to Council.

Background

An important aspect of ensuring that the City of Hamilton can support local economic growth is to make certain that it has a workforce with the training and capacity to meet the needs of local employers.

Like many cities, Hamilton is experiencing the compounded impact of a skills shortage and an aging workforce with little succession planning in place. These factors both significantly affect existing businesses and jeopardize the City’s ability to attract investment and expand local operations.

Workforce development is a broad, complex and multifaceted activity that occurs over time. Studies show that effective workforce development requires a collaborative effort of industry and community organizations, governments and the education sector, which increasingly, is an essential partner for successful outcomes.

The establishment of the Mayor’s Blue Ribbon Task Force in June 2015 was a response to the interconnected and urgent issues of Hamilton’s serious shortage of skilled trades, and an aging workforce with limited succession plans. The Task Force’s mandate is to develop a strategy to strengthen the City’s local workforce with skilled workers for both the short and long terms.

The Task Force is co-chaired by Hamilton Mayor, Fred Eisenberger and President of Mohawk College, Ron Mc Kerlie. This direct link between education and economic development embodies the Task Force’s guiding principles of collaborative effort and partnership.

The Task Force includes 15 members, with representatives from the City of Hamilton, local post-secondary institutions, industry, labour, the Hamilton Chamber of Commerce and workforce specialists, who design and deliver training programs to improve individual and organizational performance.
Recommendations

1. Build Hamilton’s local workforce capacity
2. Develop initiatives to create and sustain local jobs
3. Achieve greater alignment between employer needs and skills development
4. Create a local system to connect job seekers with local employers
5. Address negative perceptions about the City of Hamilton

Blue Ribbon Task Force Co-Chairs: President of Mohawk College, Ron McIlveen and Hamilton Mayor, Fred Eisenberger.
RECOMMENDATION 1
Build Hamilton’s local workforce capacity
Greater information sharing and new ways to collaborate among organizations and businesses are priorities, as is ensuring that the skills needed by employers are supported by the training offered by educational institutions.

**Highlighted Action**

**Province strengthens partnerships** between Mohawk College and regional employers

As announced on April 9, 2018, Mohawk College’s City School initiative will be expanded to focus on meeting industry needs. Mohawk will conduct labour market analysis in partnership with the Mayor of Hamilton’s Blue Ribbon Task Force on Workforce Development, Workforce Planning Hamilton and the City’s Neighbourhood Action Strategy. The College will then work with employers over the next three years to develop preparatory courses that address local skill shortages.
In 2016, the Province invested $1.6 million in City School to fund the custom-built mobile classroom and provide more programming to more people in the community.

Mohawk College will work with 13 local employers to create customized training that connects at-risk individuals with in-demand jobs. The employer-driven training will be delivered through Mohawk's City School initiative.

Mohawk’s City School offers tuition-free college credit courses and workshops at the Eva Rothwell Centre in North Hamilton, the Central Public Library in Downtown Hamilton and at a mobile classroom.

In 2016, the Province invested $1.6 million in City School to fund the custom-built mobile classroom and provide more programming to more people in the community.

| Cooperative education support | Industry Education Council | In progress | Support to education partners for co-op placements, classroom speakers and company tours |
| Develop leadership and management skills through collaboration | Needed skill development for mid and senior level employees, future mentorship opportunities | Mohawk College, McMaster University | In progress | - Mohawk College Enterprise Future Ready Leadership Programs  
- Hamilton Health Sciences neuroscience outreach simulation project – train the trainer model  
- Advanced placement project, executive program deliveries (Accessible Media Production, Web Design and Development), funded research project underway focused on competency based education  
- New programs to address needs – Accessible Media Production (Fall 2017), Supply Chain Management (Winter 2018), Sustainable Local Foods (Fall 2017), Analytics for Business Decision Making (Winter 2018), Community and Social Services Management (Winter 2018) |
| Leadership Summit for Women | Mohawk College, McMaster University, YWCA, Workforce Planning Hamilton | In progress | The Leadership Summit for Women is an annual, intergenerational and community-wide event that provides the skills, space, and support for all participants, regardless of gender, to reach their full potential as individuals and as collaborative members of the Hamilton community. The Summit includes established and developing leaders who participate as panelists, presenters and moderators to engage Hamiltonians in a robust, meaningful and ongoing discussion about advancing the status of women. The 2017 theme, “Be Bold,” was a call to action for young women and allies to have the courage to use their voices and challenge the status quo. 169 students, alumni and community members registered to attend this event on November 18, 2017 |
| Career Field Externship | McMaster University, Student Success Centre | Completed | 26 McMaster students participated in the Career Field Externship program between October 10-13, 2017. This program highlighted Hamilton’s diverse labour market and enabled students to gain valuable career advice and real-world employment experience while shadowing a variety of career professions in the Hamilton community |
| Change Camp Hamilton | McMaster University | Completed | Program brought together residents, students, community organizations and the City of Hamilton to participate in discussion. The projects included: Space Animation, Affordable Housing, Community Print Shop, Transportation and Food Insecurity |
| Ensure awareness of importance of organizational memory | Researched and prepared a proposal to OCWI to develop and pilot a succession planning model with engaged employers | Workforce Planning Hamilton | Completed | Funding not approved. Will seek other opportunities for funding |
| Address public transportation limitations | Senior staff from HSR and Economic Development have had several meetings to discuss extending service into City’s business parks | City of Hamilton, Economic Development, HSR | In progress | Senior staff from Hamilton Street Railway (HSR) and Economic Development have had several meetings to discuss extending service into City’s business parks |
RECOMMENDATION 2

Develop initiatives to create and sustain local jobs
To retain current Hamilton employers and attract new ones, local systems and supports must meet their needs, including the availability of local employees.

Highlighted Action

Hamilton Employment Crawl:
The Hamilton Employment Crawl was a unique initiative focusing on engaging alumni and students in both graduate and undergraduate programs.
The goals of the Hamilton Employment Crawl event, since its inception are to:

1. Attract, retain, and engage young professionals in the city
2. Provide students with an opportunity to build professional relationships and develop a sense of community
3. Meet the goal of building strong relationships with the local community partners and the City
4. Showcase the city’s growing entrepreneurial industry

In 2017/18, over 200 students were provided with tours highlighting different industry streams with local employers in the fields of ICT, Health, Advanced Manufacturing, Social Work, and Finance.

According to students, the top priority when selecting a city to live, work and play is its cultural diversity and career opportunities. This is in line with the goals of the event and students have confirmed, through feedback, that they are impressed with the breadth of opportunity available in our city.

In the near future, the Hamilton Employment Crawl is looking to expand to a one week event and explore opportunities to have students work on employer projects during the event.

| Hamilton Employment Crawl | Global Hamilton, McMaster University, Mohawk College, Redeemer University College, Workforce Planning Hamilton | Completed/ In progress | In 2017/2018 over 200 students took part in two different Hamilton Employment Crawls. The Employment Crawl is a joint partnership between all academic institutions and Workforce Planning Hamilton to showcase interesting companies in Hamilton and potential paths to employment |
RECOMMENDATION 3

Achieve greater alignment between employer needs and skills development
Greater collaboration between educators and employers would ensure educational and training programs are meeting the skills, knowledge and abilities needs of local employers, as informed by labour projections, labour market information and employer growth strategies.

**Highlighted Action**

**Employer Skills Training Advantage To Employment (ESTATE) Program**

The Employer Skills Training Advantage To Employment (ESTATE) Program has demonstrated that community collaboration effectively solves labour market shortages. Through funding received by the Industry Education Council of Hamilton from the Ontario Ministry of Economic Development and Growth, skills gaps in the Hamilton area were identified and a planned training program was developed in partnership with Mohawk College, Mohawk College Enterprise, Express Employment Professionals and multiple industry partners to resolve these shortages.

ESTATE has been a ‘demonstration project’ of the Mayor’s Blue Ribbon Task Force in Hamilton. The Task Force engaged multiple sectors across the city to determine labour market shortages. In response, a unique educational skills training program was designed to address the “skills gap” in two primary sectors: (1) Advanced Manufacturing/CNC and (2) Mobile Industrial/Hydraulics. The curriculum developed will continue to be utilized for future training opportunities at Mohawk College.

Utilizing the funds to develop a unique program delivered through a world class skills training organization, such as Mohawk College and backed by the City of Hamilton, is an effective method of directly addressing the identified skills needs in the Hamilton community. A robust program like ESTATE compresses what normally would be delivered over two years, into 28 weeks. Participants who trained in relevant skills have been employed in local companies experiencing skills shortages.
A robust program like ESTATE compresses what normally would be delivered over two years, into 28 weeks. Participants who trained in relevant skills have been employed in local companies experiencing skills shortages.

Program outcomes included participation by 41 individuals from very diverse backgrounds. Of this group who started the program 23 graduates were successful and completed the training. Program attrition was the result of individuals being hired prior to completion of the formal training as well as those who encountered personal circumstances preventing their continuation in the program. Partners included 38 companies across the Greater Hamilton Area who contributed to program success by providing advice, workplace training and hiring ESTATE graduates.

The Industry Education Council of Hamilton is uniquely positioned as a not-for-profit to identify specific community needs and accessing government and private funds. These dedicated funds support the collaborative development of training opportunities for youth, leading to employment and workforce development beginning in the formative years.

RECOMMENDATION 4

Create a local system to connect job seekers with local employers
A job matching platform, developed collaboratively with community stakeholders, would facilitate connections between employers seeking new workers and job seekers.

Highlighted Action

Implementation of Magnet – Job Matching Platform

With the funding support of the City of Hamilton, ArcelorMittal Dofasco, Mohawk College, and McMaster University, the Hamilton Chamber of Commerce hired a project manager in January of 2018 to operate and manage the execution of Magnet in Hamilton.

At the beginning of the year, Hamilton’s Magnet team underwent extensive training on the talent-matching platform and developed a comprehensive project and marketing plan for 2018. The project plan is now underway and in execution. The Magnet project manager arranged one-on-one meetings with a number of local businesses, community partners and organizations – and attended a number of career fairs and other career partner events to help recruit employers into the system.

In May of 2018, a marketing campaign was launched to reach the larger Hamilton public, and fill job seekers into the system.

To date, Magnet Hamilton has onboarded 40 local businesses and over 300 job seekers. The Magnet team anticipates these numbers will grow significantly after the summer lull. It is important to note that these numbers do not reflect the full scope of data in all of Hamilton – there are over 100 businesses and over 6,500 job seekers using Magnet in the GTHA.

As for next steps, the program will continue extensive marketing efforts and raise awareness of the platform in Hamilton-in particular there is work underway to create testimonial videos from businesses that have had success utilizing the Magnet platform.

RECOMMENDATION 5

Address negative perceptions about the City of Hamilton
Establishing Hamilton as a ‘community of choice’ for skilled workers, professionals and entrepreneurs requires effective promotion, coordination, and active planning.

Highlighted Action

Utilizing Hamilton’s Amazon Bid to Promote the City of Hamilton

In October 2017, the City of Hamilton was one of 238 municipalities vying for Amazon’s HQ2 headquarters. Although the City did not make the short list for Amazon, there is marketing collateral that can, and has been, used for other corporate initiatives to promote the City of Hamilton as a community of choice.

To date this has included the templates for various advertisements, social media platforms, and the Economic Development Annual Review - Successmakers, video messaging and pop up banners. This theme has been positively embraced by the business community and has been shared with all Invest in Hamilton Partners. The new content that was developed for the Amazon bid has also been incorporated extensively into several site location proposals for companies looking to move to Hamilton and/or expand their existing operations.

A refreshed investinhamilton.ca website will be launched in the first quarter of 2019 that will highlight extensively the community and cultural elements of the City of Hamilton.
The marketing collateral developed for the Amazon bid has been used for other initiatives to promote the City of Hamilton as a community of choice.
