

To the Great City of Hamilton

Let me introduce ourselves. We are the committee of Medical dispensaries of Hamilton. Today we are writing in regards to a special meeting of counsel. We the committee urge and encourage counsel to opt "OUT" for the reasons outlined.

In regards to the Corporation of Hamilton which is a successful viable standing business, opting IN would be a very poor business decision to make. Before you make any decisions on opting IN or OUT, we would strongly recommend this to be referred to the city staff for an opinion on whether or not this would be a smart financial decision. The monies offered from the province is pathetic. The money will not cover your costs to to sustain dispensaries. The Committee of Medical Dispensaries if allowed will propose a far more lucrative deal for the city and offer considerable more then the present provincial structure not only covering your costs totally but also building up the city coffers. The collection of monthly fees will be enough to regulate and enforce licenses. The Hamilton economy will also prosper from this deal. We will create numerous of jobs for our blue collar town Hamiltonians and a greater tax base. The other serious issue we have at hand is that we believe that there is a great medical need and a great shortage of supply presently through Health Canada that we can instantly address. We have done our due diligence and we are prepared to sit down and try to broker a deal that is financially sensible and looking out for the best interest of the people that need the product medically. we are here to partner and work with the city. Remember, you can always opt IN , but once you say yes, you will be locked in forever with Mr. Ford group. Be strong , be independent.

Thank you for your time respectfully

The Committee of Medical Dispensaries of Hamilton

DAVE JACKSON.
