I support keeping the City Council meetings in the evening - and doing that every month of the year so residents have the best opportunity to view the meetings, and can count on a regular time for Cable 14 broadcasts, as well as the live stream video. The current practice of daytime meetings during the summer months is disruptive of the objective of engaging the public in city affairs. I also think maximum time limits on meetings should be put in place including mandatory lunch and supper breaks. Councillor Ferguson has a good point about the difficulty of a meeting that went to 3 am, but changing the start time is the wrong solution.
