- Each year an estimated 500 billion plastic bags are consumed world wide, which is equivalent to 1 million plastic bags being consumed per minute.
- In the ocean plastic is broken down into very small pieces - microplastics - which can then be consumed by fish and are indigestible.
- 90% of seabirds are found to have consumed some kind of plastic.
- One in three marine mammals are found to have been entangled in marine litter

The ban would include:
