2017 Growth Plan	Draft Amendment No. 1 Policy Change	2019 Growth Plan Policy	Comments
<p>4.1 ... The <i>water resource systems, Natural Heritage System, and Agricultural System</i> for the <i>GGH</i> also play an important role in addressing climate change and building resilience. Greenhouse gas emissions can be offset by natural areas that act as carbon sinks. Municipalities play a crucial role in managing and reducing Ontario's greenhouse gas emissions and supporting adaptation to the changing climate. The Province will work with municipalities to develop approaches to inventory, reduce, and offset greenhouse gas emissions in support of provincial targets as we move towards the long-term goal of net-zero communities.</p>	<p>4.1 ... The <i>water resource systems, Natural Heritage System, and Agricultural System</i> for the <i>GGH</i> also play an important role in addressing climate change and building resilience. Greenhouse gas emissions can be offset by natural areas that act as carbon sinks. Municipalities play a crucial role in managing and reducing Ontario's greenhouse gas emissions and supporting adaptation to the changing climate. The Province will work with municipalities to develop approaches to inventory, reduce, and offset greenhouse gas emissions in support of provincial targets as we move towards the long-term goal of net-zero environmentally sustainable communities.</p>	No changes from draft Amendment No.1.	This policy reduces the emphasis on moving away from a carbon based economy as well as importance of mitigation measures.
<p>4.2.1.2 <i>Water resource systems</i> will be identified, informed by <i>watershed planning</i> and other available information, and the appropriate designations and policies will be applied in official plans to provide for the long-term protection of <i>key hydrologic features, key hydrologic areas, and their functions.</i></p>	<p>4.2.1.2 <i>Water resource systems</i> will be identified, informed by watershed planning and other available information, and the appropriate designations and policies will be applied in official plans to provide for the long-term protection of <i>key hydrologic features, key hydrologic areas, and their functions.</i></p>	No changes from draft Amendment No. 1.	<p>Staff supported this policy change through Amendment No. 1 and it has been maintained in the 2019 Growth Plan.</p> <p>Intent of the policy to ensure long term protection of water resource system is maintained, but the added flexibility is beneficial to the municipality in terms of cost and resources.</p>
