

Forest Cut Down

Hello, my name is Charles and I am here to discuss the matter with the forest behind my house, also known as edge lake park/forest. I have had many good memories in this forest, and I don't want to lose it, especially because my dead hamster, Thunder is buried in that forest. I will now discuss the reasons that I don't want to lose this amazing piece of land that god gave to us. 1: It will destroy the ecosystem. Many plants and animals live in that forest and they matter just as much as we do. And we are destroying their ecosystems just for the money to destroy more ecosystems. 2: one day if we do build these buildings we will look back and regret our actions towards these beautiful creatures because you are stopping kids like me to explore and discover these creatures. And for a school board, I don't think that's what you want to do. 3: My house has been getting a lot of flooding recently, that is because the pipes aren't big enough to hold all the water that is being produced, so more building = more water, more water = more flooded houses. And those are my reasons that we shouldn't destroy the forest. Thank you for listening to my speech.
