Re: Support Resolution - High Speed Internet Connectivity in Rural Ontario

At its meeting held on April 28, 2020, the Council of the Township of Armour passed Resolution #6 supporting our Councillor Rod Ward's letter regarding the need to make substantial investments in high-speed internet connectivity in the rural areas of Ontario.

A copy of Council's Resolution #6 dated April 28, 2020 and Councillor Ward's letter is attached for your consideration.

Sincerely,

Charlene Watt
Deputy Clerk

Cc: MPP Norm Miller, MP Scott Aitchison and Ontario Municipalities

CORPORATION OF THE TOWNSHIP OF ARMOUR

RESOLUTION

Date: **April 28, 2020**   **Motion #** 6

That the Council of the Township of Armour supports the letter, dated April 15, 2020 from Councillor Rod Ward, on the need to make substantial investments in high-speed internet connectivity in rural areas. Furthermore, that this resolution and the letter be circulated to Scott Aitchison, MP for Parry Sound-Muskoka, Norm Miller, MPP for Parry Sound-Muskoka and all Ontario municipalities requesting their support.

To whom it may concern,

The COVID-19 pandemic in Ontario has highlighted both our positive responses to a crisis, and some definite shortcomings in infrastructure, systems and services which need to be addressed on a long-term basis. Setting priority on solving these issues will be a challenge, given the differing agendas and the strained budgets. Solving fundamental issues should focus on the most basic needs as a starting point. One of the clear needs in a rural community such as the Almaguin Highlands, highlighted further by recent events, is the need for proper high-speed internet connectivity. Healthcare and education are both going down a path where appropriate connectivity is assumed. Like many models that move outward from metropolitan areas, this assumption is lost on rural areas. For the vast majority of households in our community, true high-speed connectivity simply does not exist. For the vast majority of future strategies in healthcare and education, there is an assumption that it does exist.

Even in areas in the Almaguin Highlands which have 'high-speed' internet, the overall infrastructure is still limited. It is certainly not designed to deal with a sudden huge peak in demand. Whereas the capacity in large urban centres is built to handle the added throughput, there are clear limitations here. The best way to explain it is a comparison to hydro. Imagine if everyone went home at the same time and turned their lights on, but because there wasn't enough hydro capacity overall, all lights were 50% dimmer than normal and some appliances simply didn't work. We no longer have to imagine what happens with internet speed during peak usage. Suddenly during the COVID pandemic, people are working from home who have never worked from home. Kids are trying to do courses on-line. People who are not working are turning on-line to stay connected. Video-conferencing, which was a totally foreign concept to many, is now part of daily routine. Any idea how much internet bandwidth video uses? It's no wonder we hit a wall.

The future of healthcare sees patients being monitored and cared for in their own homes, through the use of technology. The future of education sees students doing much of their learning on-line. The future of business and commerce sees the ability to function outside the 'bricks and mortar' of an office location. Malls disappear and on-line shopping is the norm. For some, that future has already arrived. Our area has already been drastically affected by cutbacks in the area of healthcare and education through gradual decreases in budgets and services. Technology offers us the ability to level the playing field to a great extent. High-speed connectivity cannot be seen as a luxury or a nice-to-have, any more than hydro should be seen that way. In order to solve some other problems (i.e. skyrocketing budgets in healthcare and education) the wise investment is in providing connectivity for every resident in the province.

Rod Ward
Councillor
Armour Township
