Subject: RE: Ask your local CBC radio station to do what CBC Radio Victoria has been doing for 7 months

Hello Magda,

I'd like, if possible, to add the following to my submission to Council.

While CBC radio is not 'local' to Hamilton, your city does have a local television station (www.chch.com) and a local, heavily listened to radio station - 900 CHML - which has local talk and news, including business reporting.

Perhaps the effort to have the citizens of Hamilton stay aware of the CO2 levels, the single most important environmental indicator we have available, could also be extended to those media outlets.

Again, many thanks for your assistance.

Rick
