Subject: 62 6TH CONCESSION E FLAMBOROUGH (WARD 15) POSSIBLE HERITAGE PROPERTY:

Importance: High

Good Afternoon Miranda,

This email is in follow up to the previous email discussion that stems from an original complaint we received from a neighbour of the above noted address. This was sent to our Municipal Law Enforcement Dept. for investigation under the Property Standards bylaw. Upon investigation, the Officer reported some heritage factors to the barn that is on site. I have included part of the report below and highlighted the sections pertaining directly to the barns heritage component. As well, it sounds like there may talk of the owner wanting to take down the barn before it is recognized for its heritage value.

Could we please have this location brought forward to the Municipal Heritage Committee at their next meeting and request to have this listed on the register. I have attached the photos that the Officer provided for the committee's review. Alternatively, if it is not the will of the committee, please request to have it sent back for more investigation behind the history to this property. Thank you for your assistance with this request.

- *As far as the barn is concerned it does not appear dangerous in fact, it appears to be a heritage of local heritage. The foundation and beams are gorgeous. The cornerstone say 1884. The exterior for resale of the ever popular barnboard. I would recommend that someone from Heritage (no idea further into this barn as my experience says that this barn will be dismantled and property used for Interestingly, everything is emptied however just on the inside of the garage are flammable items... lubricant, and some flammable cleaner (varsol or something). The neighbour-lifelong resident was talk about getting the barn destroyed before some regulations or timeline of something passed by.*

Kind Regards,
Christine DiGiantomasso,

Administrative Assistant to Councillor Judi Partridge, Ward 15 ~ Flamborough
