**Subject:** Science clearly backs up No need for Masks..  
**To:** Ferguson, Lloyd <[Lloyd.Ferguson@hamilton.ca](mailto:Lloyd.Ferguson@hamilton.ca)>, Office of the Mayor  
 <[mayor@hamilton.ca](mailto:mayor@hamilton.ca)>, Clark, Brad <[brad.clark@hamilton.ca](mailto:brad.clark@hamilton.ca)>

Dear Mayor, et al

See updated data for Ontario March - July 2020.

I understand that City of Hamilton council members are considering passing a new bylaw requiring mandatory masks in all indoor public areas as per the advice of the Hamilton County Health Unit.

If this had been presented and implemented back in March, and imposed during the build up and peak period in "the curve", it would have been more acceptable and made practical sense.

Now that the curve has flattened to the point of "flat line", and case numbers are currently at two for the city and the county combined, it seems we are closing the barn door after the horse has already escaped.

Recovery rate is 99+% which is looking at the glass 1/2 full. The Media are not the experts, and seem to focus on the glass 1/2 empty. And yet as the cases increase as more people get tested the death rate lowers. In April 78% of the deaths were from LTC facilities. therefore there is no need to force masks on the population as a whole.

Experts have huge support : [https://masksickness.ca/articles/2020/06/25/masks-dont-work-review-science-relevant-covid-19-social-policy?fbclid=IwAR0oFayFxFvwtHFgCMpQ9D\\_dmU6y7wPRxHofMd7GAp8eOrj6MUuJQSvUJets](https://masksickness.ca/articles/2020/06/25/masks-dont-work-review-science-relevant-covid-19-social-policy?fbclid=IwAR0oFayFxFvwtHFgCMpQ9D_dmU6y7wPRxHofMd7GAp8eOrj6MUuJQSvUJets)

Let's ignore the actual, negligible statistics and assume the virus is as virulent and contagious as your health director is purporting. If this is the case, then every mask being worn becomes potentially contaminated in very little time, whether being worn in solitude or among a store full of shoppers. By virtue of the fact every breath potentially draws in contaminated, infectious particles against the front of a mask, and every exhale potentially pushes contaminated, infectious particles against the face side of the mask, this potentially, and quickly becomes the most contaminated item any one of us can have on our person, or hanging from the rear view mirror awaiting the next point of use.

So here's what I expect your council to fulfill as commitment of their concern for the health of the general public...

1) Every public indoor area (all stores included) hand out appropriate, new face masks, provided for free by the City of Hamilton , no exceptions. This will be the ONLY way the general public can be assured contamination is not being transferred from store to store, home to store, store to home, car to store, store to car, car to home, home to car, etc., etc..

2) Every public indoor area (all stores included) must have a medical grade disposal unit located at the exit, and, every patron must dispose of their masks upon leaving. Every time! Once again, this will eliminate the transfer of contaminates from store to store, store to car (rear view mirror decor), car to store, car to home, home to car, etc., etc.. This disposal bin and monitoring of mask disposal must be provided free by the City of Hamilton and not become incumbent on the merchant.

3) Failing to provide this level of service and concern for the general well being of City of Hamilton citizens renders the mandatory mask bylaw null and void. Setting all collateral health consequences aside as a result of mask wearing, requesting citizens to participate in an invalid campaign to minimize spread of a contagion during a "crisis" is fraudulent in nature, and inviting cause for liability suits against city and council.

Your consideration on this matter is duly required.

Respectfully,

Erin L Davis
