Subject: Upcoming GRIDS2 Meeting

Dear Chad:

Please vote to stop urban sprawl and encourage using vacant land within our Hamilton urban boundary for any future development. Encourage going vertical with the exception of properties along our waterfront.

Urban sprawl is bad for the environment and will be a pox on taxpayers as we will have to continually pay higher property taxes to sustain everything that expansion entails.

Having developers pay the cost of expansion won't work because they will just pass on their costs to the purchaser of their developments.

Warmest regards,

Michael Cuberovic
