**Subject:** stop urban area expansion

I am strongly encouraging the mayor of Hamilton and city councillors to delay consideration of expanding urban lands by increased low density housing. In person public consultation must take place. Rapid land urbanization is being pushed forward during a covid pandemic and is not appropriate action to take at this time.

On March 29, please delay any discussion of increased urbanization which will reduce foodlands and make way for more low density housing.

Respectfully,  
Mary Beth Neibert
