Subject: Municipal funding for Hamilton Bike Share

City of Hamilton Clerk,

I strongly support municipal funding for Hamilton Bike Share.

Strengthening Hamilton Bike Share is a great way to tackle numerous serious issues facing our community. A robust network of cycling infrastructure will satisfy the following.

- Reduced greenhouse gas emissions will help mitigate damage from climate change, and is in alignment with the city declared climate emergency.
- Supports equitable access to infrastructure through affordable and subsidized rentals enabling citizens to live a more inclusive and enjoyable lifestyle.
- Minimized need for expensive, complex, resource intensive transportation solutions.

I regularly use the Hamilton Bike Share network and can attest to the success of the program. While I am privileged enough to have access to any mode of transport I require I still choose Hamilton Bike share because it is quick, convenient, and conserves resources.

Cycling is an efficient, healthy, and affordable mode of transportation that can play a critical role in a sustainable and equitable City of Hamilton .

Sincerely

Kevin Intini
