(iii) Team Up to Clean Up Updates (Added Item 13.4)

Changes have been made to capture statistics, increase efficiency, and improve transparency/accountability more accurately. Staff are working with Web Services to automate the request for supplies. The online form will provide citizens with two options; “one-time cleanup event” and “ongoing community cleanups”. For “one-time cleanup event” supply/collection requests, supply packages will be tailored to the number of participants. For the “ongoing community cleanup” supply requests, pre-made standardized packages will be available.

Staff will be working to develop an optional feedback form to distribute to volunteers near the end of the season. This will provide an opportunity to capture more qualitative data that can have significant impacts on continuous improvement initiatives.

(Duke/Toppin)

That the Team Up to Clean Up Updates, be received.
