GIC Special Meeting Budget 2023

21 Nov 2022

An aerial photograph of an industrial or urban area, showing various buildings, roads, and parking lots. A large plume of white smoke or steam rises from the center of the image, partially obscuring the buildings below. The overall tone is somewhat hazy and industrial.

“Local governments have direct or indirect control over 60% of Ontario’s greenhouse gas emissions. There are no substitutes for local information, local capacity and local strategies and solutions.”

Yuill Herbert, Sustainability Solutions Group, 2019

Our Story

BACCC harnesses the power of the community to fight climate change. Our strength lies in collaboration and the diverse expertise of our member organizations.

Supporting:

- GHG emissions reduction goals
- Funding proposals to gain additional resource supports
- Innovation and collaboration across multiple sectors
- Key regional stakeholders
- Municipal policy, practice and programs related to climate change
