Dear Ms. Pilon

**Re: Appeals pursuant to sections 22(7) and 34(11) of the Planning Act
Appeal filed on behalf of 2480545 Ontario Inc. (The "Company")
Proposed Official Plan Amendment to City of Hamilton
Proposed Zoning By-law Amendment to City of Hamilton Zoning By-law
Respecting 1629, 1635, 1637 and 1655 Main Street West, Hamilton (the "Subject
Lands")**

Municipal File No. ZAC-20-042 & UHOPA-20-027

We are the solicitors for the Company, the owner of the Subject Lands. By way of this letter and on behalf of our client we hereby appeal the Official Plan and Zoning By-law Amendment applications to the Ontario Land Tribunal ("OLT" or "Tribunal") pursuant to sections 22(7) and 34(11) of the Planning Act. The Official Plan and Zoning By-law Amendment applications were deemed complete effective Tuesday, December 1, 2020. Since then, more than 120 days have elapsed, and the City of Hamilton has failed to make a decision on the applications.

The Subject Lands are approximately 0.75 hectares in size, are irregular in shape and are situated south of Main Street West. The Subject Lands front Main Street West, Ewen Road, and Rifle Range Road. Currently the Subject Lands are relatively flat and are occupied by three (3) 1-storey commercial buildings. All existing buildings on the Subject Lands will be demolished to facilitate the proposed redevelopment.

The Subject Lands are part of a major redevelopment proposing a mixed-use building comprising three towers atop a common podium. The proposed development will allow for the construction of 583 desperately needed housing units with a density of 844 units per hectare. The podium will be three (3) storeys tall and contain at grade retail commercial retail space.

Yorkville Office:
188 Avenue Road,
Toronto, ON., M5R 2J1
P. 416.368.2100 | F. 416.368.8206 | ksllp.ca

Downtown Office:
250 Yonge Street, Ste 2302
P.O. Box 65,
Toronto, ON., M5B 2L7
P. 416.368.2100 | F. 416.368.8206 | ksllp.ca

The three towers of the proposed development are each separated 25m from each other and are designated as Tower C, Tower B, and Tower A. Each tower is 24, 21, and 16 storeys tall respectively. Between the towers and the podium base is a unique open airspace between storeys 4 and 5. The proposed development will differ in height, massing, materials and stepping between the three towers.

The proposed development will enhance the public realm by facilitating a pedestrian friendly environment thus implementing the goals of the City's Urban Official Plan ("OP"). The proposed development is transit-supportive and will optimize existing and planned infrastructure in the area. The Subject Lands are located within walking distance of a world class university, and provides desperately needed housing units to its faculty, staff and students. The proposed development is in accordance with good transit and pedestrian-oriented development principles that are stated objectives of both provincial and local policy.

Consistency with the Provincial Policy Statement 2020 ("PPS")

The proposed development is consistent with the PPS. The Subject Lands are within a settlement area, which is the focus of growth and intensification under the PPS. More specifically, the proposed development is consistent with the following policies in the PPS:

- Policy 1.1.1 which provides that healthy, livable and safe communities are sustained by efficient development and land use patterns that financially bear the Province and municipalities over the long term and accommodates an affordable and market based range and mix of residential housing types.
- Policy 1.1.3.2 which provides that land use patterns within settlement areas shall be based on densities and a mix of land uses which efficiently use land and resources, are appropriate for, and efficiently use, the infrastructure and public service facilities which are planned or available, and avoid the need for their unjustified and/or uneconomical expansion, and are transit-supportive, where transit is planned, exists or may be developed.
- Policy 1.1.3.2 which provides for appropriate and efficient use of infrastructure, public service facilities and support active and transit supportive transportation.
- Policy 1.1.3.3 which provides that planning authorities shall identify appropriate locations to promote opportunities for transit supportive development. These developments should accommodate a significant supply and range of housing options.
- Policy 1.1.3.4 which provides that appropriate development standards should be promoted which facilitate intensification, redevelopment and compact form, while avoiding or mitigating risks to public health and safety.
- Policy 1.4.1 which provides that in order to provide for an appropriate range and mix of housing options and densities planning authorities shall accommodate residential growth for a minimum of 15 years through intensification and redevelopment.
- Policy 1.4.3 which provides that planning authorities should provide for an appropriate range and mix of housing options and densities to meet projected market based and affordable housing needs of current and future residents.
- Policy 1.6.3(a) which provides that before consideration is given to developing new infrastructure and public service facilities the use of existing infrastructure and public service facilities should be optimized.

- Policy 1.6.6.1 which provides that planning for sewage and water services shall accommodate forecasted growth in a manner that promotes the efficient use and optimization of existing municipal sewage and water services.
- Policy 1.6.6.2 which provides that municipal sewage services and municipal water services are the preferred form of servicing for settlement areas to support protection of the environment and minimize potential risks to human health and safety. Within settlement areas with existing municipal sewage services and municipal water services, intensification and redevelopment shall be promoted wherever feasible to optimize the use of the services.
- Policy 1.6.7.2 which provides that efficient use should be made of existing and planned infrastructure.
- Policy 1.6.7.4 which provides that land use patterns density and a mix of uses should be promoted to minimize the length and number of vehicle trips.
- Policy 1.7.1 which provides that the City should optimize its long-term economic prosperity.
- Policy 1.8. which requires the City to encourage improved air quality, reduced greenhouse gas emissions, and prepare for the impacts of a changing climate through land use and development patterns.

Conformity with A Place to Grow: The Growth Plan, 2021 (“Growth Plan”)

The proposed development conforms with the following policies in the Growth Plan:

- Policy 1.2.1 which provides that development should achieve complete communities that are designed to support healthy active living and meet people’s needs for daily living throughout an entire lifetime.
- Policy 1.2.3 which provides that the policies of the Growth Plan represent minimum standards.
- Policy 2.1 which provides that, to support the achievement of complete communities, this Growth Plan establishes minimum intensification and density targets.
- Policy 2.1 which provides that it is important to optimize the use of the existing urban land supply as well as the existing building and housing stock to avoid over-designating land for future urban development while also providing flexibility for local decision-makers to respond to housing needs and market demand. The Growth Plan's emphasis on optimizing the use of the existing urban land supply represents an intensification first approach to development and city-building, one which focuses on making better use of our existing infrastructure and public service facilities, and less on continuously expanding the urban area.
- Policy 2.2.1.2(a) which provides that the “vast majority of growth will be directed to settlement areas that: i) have a delineated built boundary; ii) have existing or planned municipal water and wastewater systems; and iii) can support the achievement of complete communities”.
- Policy 2.2.1(3)(c) which provides direction for an urban form that will optimize infrastructure, particularly along transit and transportation corridors, to support the achievement of complete communities through a more compact built form.
- Policy 2.2.2(3)(d) which ensures that lands are zoned and development is designed in a manner that supports the achievement of complete communities.

- Policy 2.2.1.4 which provides that the policies of the Growth Plan will support the achievement of complete communities.
- Policy 2.2.2.1 which provides that a minimum of 50% of all residential development within the City of Hamilton will be within the delineated built-up area.
- Policy 2.2.2.3 which requires all municipalities to develop a strategy that will achieve the minimum intensification targets.
- Policy 2.2.4.3(b) which provides that MTSAs will have a minimum density of 160 residents and jobs combined per hectare.
- Policy 2.2.1.3 (c) which provides that the city should manage forecasted growth in a way that provides direction for an urban form that will optimize infrastructure, particularly along transit and transportation corridors.
- Policy 2.2.4.9 which provides that within all MTSAs development should be supportive of reduced parking standards.
- Policy 2.2.4.10 which states that lands near future transit should be planned to be transit supportive.
- Policy 5.2.5(1) which provides that the minimum intensification and density targets in this Plan, including any alternative targets that have been permitted by the Minister, are minimum standards and municipalities are encouraged to go beyond these minimum targets, where appropriate, except where doing so would conflict with any policy of the Growth Plan, the PPS or any other provincial plan.

Conformity with the Urban Hamilton OP ("UHOP")

Bearing in mind that the development proposes an amendment to the UHOP and thus strict adherence to the UHOP is not required, the proposed development nevertheless conforms with certain aspects of the UHOP. The Subject Lands are designated *Main Street Secondary Corridor* in the UHOP and are located steps away from McMaster University which is identified as a *Major Activity Centre*. The Subject Lands fall just adjacent to a *Primary Corridor*. The proposed development conforms with the following policies in the UHOP:

- Section B.2.4.1.3 b) which provides that Urban Corridors and Urban Nodes shall be planned to accommodate approximately 40% of the residential intensification.
- Section E.1.0 g) which provides that residential intensification should be focused in Urban Nodes and Urban Corridors.
- Section E.2.1 which provides for the development of nodes and corridors in the City by focusing redevelopment and activities that provide a vibrant pedestrian environment.
- Section E.2.1 a) which provides that Nodes and Corridors should be the focus of re-urbanization.
- Section E.2.1 d) which provides that Nodes and Corridors should evolve with higher residential densities and mixed use developments to achieve their planned functions and support transit.
- Section E.2.4.3 which provides that Urban Corridors shall be the location of higher density land uses including mixed uses where feasible.
- Section E.2.4.6 which provides that Urban Corridors shall function as commercial spines providing retail stores and commercial services that cater to the weekly and daily needs of residents.

The proposed development also complies with the following City-Wide Planning principles and Design Guidelines. These guidelines apply to roads that front arterial roads within 400m of a corridor.

- Section 4.11 provides that land assembly is encouraged in development to include design features that minimize the impact of new developments and, create opportunities for larger properties to front the main street.

Meets General Principles of Good Planning

The Subject Lands have been identified at the provincial, regional, and local level as an area where growth should be directed. The proposed development meets the general principles of good planning by contributing significantly to long-term, orderly growth and efficient use of services in a transit-oriented area.

Conclusion

For the forgoing reasons, and others to be provided at the hearing of the appeals, our client appeals its Official Plan Amendment and Zoning By-law Amendment Applications to the OLT. In support of the appeals please find enclosed the following documents:

1. The OLT Appeal Form A1 (completed);
2. A draft Official Plan Amendment;
3. A draft Zoning By-law Amendment; and
4. Our firm's cheque in the amount of \$2,200 payable to the Minister of Finance, Ontario, representing the OLT's appeal fees.

Our client requests that both appeals be heard together. By separate appeal letter our client is also appealing its Official Plan Amendment and Zoning By-law Amendment applications for its development at 17 Ewen Road, Hamilton. That property is adjacent to the Subject Lands. It would be efficient if the appeals of both properties were scheduled for the same first CMC as we suspect that many parties of one appeal will seek status in the other appeal. We are not asking that the appeals of the two properties be consolidated at this time; only that they be administratively joined for the purpose of the first CMC. Thank you.
