The extension of lake-based municipal service systems may be necessary if private or municipally-operated communal water or wastewater treatment systems experience serious operational constraints or failures in future. The City operates communal water supply systems in Freelton, Carlisle, Greenville and Lynden as a result of private water service failures, operator default and/or previous public health emergencies. A variety of private communal water and wastewater systems associated with specific developments have also been established in the past. Many existing communal systems operate in conjunction with privately maintained sewage disposal systems resulting in partly serviced rural development. Partly serviced rural development is subject to a higher risk of failure and the potential for future public health emergencies. Therefore, it is the objective of this Plan to restrict both the creation and expansion of communally serviced or partially serviced rural development.</p>	<p>extension of lake-based municipal service systems may be necessary if private or municipally-operated communal water or wastewater treatment systems experience serious operational constraints or failures in future.
