

Appendix C. Implementation Strategy for the First Phase of Pending Actions

("+" indicates that the action will result in further funding requirements based on the findings from the first phase)

Ranking	Action	Type of Project	Project Timeline	Objectives	Estimated Cost of Implementation	Implementation Plan
10	Install low impact development projects in priority areas.	Capital / Study	Short-term (1-3 years)	1. Pollution Reduction 2. Infrastructure and Operational Improvements	\$1,000,000 +	<p>Plan: Investigate areas within the City that are most susceptible to flooding and/or that are contributing to combined sewer overflows. Once identified, work to design and implement Low Impact Development projects that include operation and maintenance requirements.</p> <p>Financial: Estimated cost is expected to cover the action with additional funds available for some initial Low Impact Development projects.</p>
