## WEST HARBOUR DEVELOPMENT SUB-COMMITTEE

November 26, 2024

Planning and Economic Development Department Municipal Land Development Office – Economic Development Division

Prepared By: Andrea Smith, Brian Hollingworth

#### **Updated West Harbour Waterfront Parking Strategy**

#### Public Parking – A Component of Municipal Asset Portfolio

Public Parking is a Public Asset Serving a Range of Public Interests

#### **Various Municipal Assets:**

- ✓ Public Parking |
- ✓ Storm Water / Water / Wastewater
- ✓ Waste and Diversion
- ✓ Transportation
- ✓ Parks and Open Space
- ✓ Recreation
- ✓ Civic Facilities
- ✓ Cemeteries
- ✓ Transit
- ✓ Information Technology

Source: Google

#### Waterfront Parking Strategy is Multi-Pronged and Will Evolve over Time

- Use of available existing public parking supply at remote lots (Bayfront and Eastwood)
- Existing and Enhanced Transit Service
- Provision of Cycling and Walking Infrastructure, Transportation Demand Management Measures
- Use of Pricing Strategies for Paid Parking
- Monitor and Manage and Recalibrate Strategies as area Develops
- Additional public parking spaces for vehicles

#### **Projected Parking Shortfall**

- Updated Analysis projects a shortfall of 500 (weekday) 850 (weekend) parking spaces at full-build out of Waterfront
- Projected shortfall is due to displacement of existing parking by development, as well in additional public uses (excludes Pier 8 development)
- Projections take into account high levels of transit/walking/cycling, use of remote parking, and shared parking between uses
- Notwithstanding projected shortfall, there is a need to find the right balance between demand and supply: Too much parking is as harmful as too little
- Insufficient parking can impact roles of the West Harbour, being both a citywide destination and neighbourhood
- Parking supply and paid parking can be phased in

#### **Components: Updated Parking Strategy**

- 1. Integrate parking spaces in development
- 2. Pause Pier 4 Above Ground Parking Structure Study
- 3. Paid Parking
- 4. Increased Transit Service
- 5. Implement Range of Travel Demand Measures
- 6. Monitor and Manage Evolving Parking Demands
- 7. Temp Parking Lot Improvements
- 8. Ensure Required Parking within Pier 8 is Provided
- 9. Use Remote Lots

10.Explore End-of-Line Transit Infrastructure

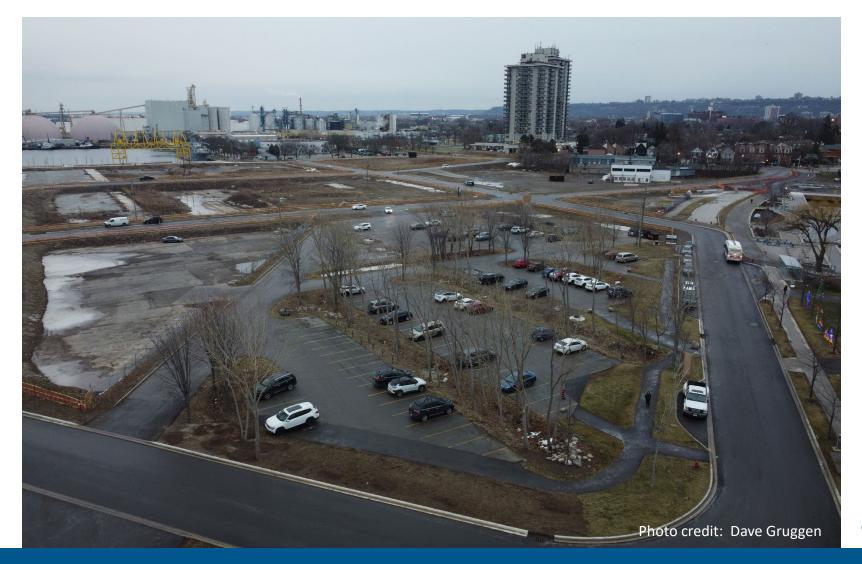

# Integrate Public Parking Underground – Pier 8 "Area of Focus"

7

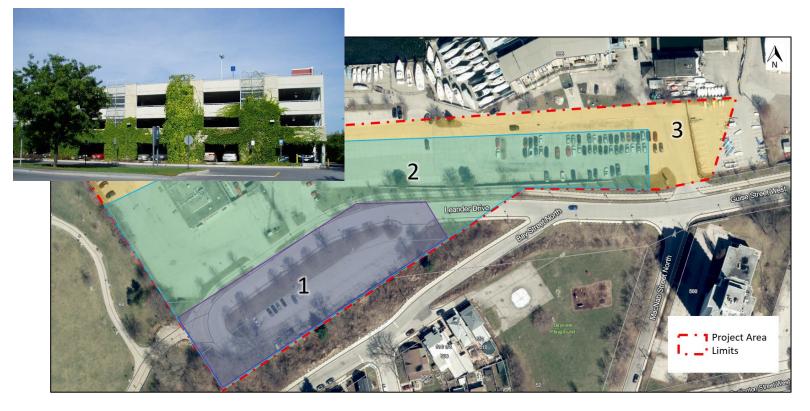

#### **General "Area of Focus" for Below-Grade Parking Structure**

Planning and Economic Development Department Municipal Land Development Office - Economic Development Division

#### Pause Pier 4 Above-Ground Parking Structure Study

Previously identified locations for potential parking structure (Leander lots)

Planning and Economic Development Department Municipal Land Development Office - Economic Development Division

#### **Monitor and Manage Parking Demands**

16

#### **Key Report Recommendations - Summarized**

- **Approve** the Updated West Harbour Parking Strategy
- Negotiate a parking agreement with Waterfront Shores to integrate 300 public parking spaces within the "Area of Focus" on Pier 8
- Concurrent to negotiations, City staff to assess
  ownership/operating model options and financial implications
  and report back to Committee/Council prior to finalizing the
  agreement
