GFL has been caught excepting hazarads waste. 8 loads @ 40 ,000 lbs equals 300,000 of e colie slug. From Chedoke with out a fine.. Employee with Cancer and respritory issues. A Accountant who has found issues with the book. Told to look the other way. The Green Mountain Gardens was closed because of odour issues. But the dump stays open. With a 4000 name petition to close it down. The location is to close to housing. And greed to keep building doesnt stop. Thus real estate values are going down because of Gfl. And now a School less than 300 ft from to be built really ???. The lies to the community for the last 2 years. Has angered the community. By adding so many chemicals to treat the leache. They have turned this area in to . The City into a chemical valley.
