Subject: Ongoing Concerns Regarding Stoney Creek Dump and GFL's Negligence

External Email: Use caution with links and attachments

Dear GIC Committee,

I am writing to formally express deep concerns about the ongoing issues surrounding the Stoney Creek dump and the serious impact it has had on residents in the area. Over the past several years, the putrid odor emanating from the landfill has significantly affected our community's quality of life, making it increasingly difficult for residents to enjoy their homes and outdoor spaces.

Despite repeated complaints and public outcry, GFL Environmental has demonstrated ongoing negligence in addressing these concerns. Their waste management practices continue to fall short of acceptable standards, and their lack of effective mitigation measures has exacerbated the issue. The persistent foul smell is not just an inconvenience—it raises concerns about air quality, potential health risks, and declining property values.

Residents deserve transparency and accountability from both GFL and the governing bodies overseeing its operations. We urge immediate and meaningful action to address this issue, including stricter enforcement of environmental regulations, enhanced odor control measures, and a long-term plan to ensure responsible waste management.

We would appreciate a prompt response outlining what steps are being taken to resolve this matter. Our community should not have to endure these conditions any longer.

Sincerely,

Sara Cino
Stoney Creek Resident
