**Subject:** GCL dump in victory and lush area

**External Email:** Use caution with links and attachments

This email is to bring to your attention the continuous strong odor emissions and shabby dumps in the residential area of victory and lush neighbourhood, of which my myself and my family are residents. In addition there is a high risk of polluted groundwater drainage to the water sources which supply water in the area.

As a member of the community I request the city to shut the dump as it is causing grave disturbances related to environmental pollution and harmful intakes into our senses and not limited to strong odor, large mountains of garbage dumps and dirty rain or snow water drainage in the area.

The dump is preventing us from normal chores like walking in the area due to strong gaseous smells, dirty heaps of junk sticking out and polluted water around the area.

Look forward to your urgent action.
