I have lived in Upper Stoney near the GFL landfill for approx 45 years.

When it was the taro dump it was pretty much unnoticeable except for the odd odor, but they would fix it immediately.

Now that GFL is in control of the landfill there has been CONTINUOUS odors for years. It's so bad I cannot sit outside and enjoy my backyard in the warmer months. Not only is the GFL landfill hideous to look at but the odors that are emitted from this property are beyond disgusting. Not only are the smells relevant to the summer months but they continue all winter long as well. When I run errands in my beautiful neighborhood all I can smell is the terrible stench. Not to mention the filth of 1st rd when the trucks are pulling whatever chemicals etc out of there and now we are driving through it and bringing it to our homes.

When is this going to end? It seems that there are no rules for this landfill no matter what we the taxpayers have to say about it.

This landfill should be permanently closed if they cannot abide by any environmental rules and regulations.

Thank you for listening.
