Dear GIC Committee,

I am writing to lodge a complaint regarding the ongoing issue with GFL landfill site located near 65 Green Mountain Rd west and First Rd Stoney Creek. Our living conditions have unbearable since April 2023, and I am deeply concerned about the impact it is having on our residential community. The toxic stench daily from the landfill is absolutely disgusting and makes it impossible to enjoy our homes and community space. We cannot keep our windows open or sit in our front or back yards. It is truly embarrassing to family or friends visit our home. GLF should not be accepting new waste until they can fix the problem. We residents of this area request the city to grant us a tax break as compensation since we cannot fully enjoy our homes and outdoor community. We also plead to the city and province to ensure there is a relocation plan in place for this landfill. It was originally planned to close when we purchased our new homes as it is not safe for it to continue operation in our community.

Regards  
Diana
