Subject: Foul odours from the dump at Green Mountain and First Street

External Email: Use caution with links and attachments

Hello,

When I moved there this neighborhood on \_\_\_\_\_ in 2016, I was told the dump was closing in 2019 or 2020 and a park would be established in its place.

But lo hold and behold, to this community's surprise and disbelief the authorities renewed the dump's contract and the foul odour continued to permeate through with more vigorous than ever.

This has caused so much harm to our quality of life:

- we cannot enjoy the outdoors in our own backyard as all we can smell is the stench from The dump
- we cannot socialize in our own home as our guests will smell that foul odour.
- we get nausea and major headaches caused by the stench
- we cannot open our windows as all we smell is the foul odour coming from the dump!

Please CLOSE that dump and give us our QUALITY of LIFE back!! This dump is costing us our health!

Thank you,

Mary Chedumbarum-Ramasamy
