Subject: Library drug site???

External Email: Use caution with links and attachments

Hello,

Emailing to express concern over whoever idea it was to use family public libraries as safe drug sites? Absolutely not. This is appalling and disgusting. Hamilton might as well just take away the library all together and call it a shelter. I will never take my family to the library again, this is so wrong and unsafe for our community and our children. I cannot imagine anyone feeling safe with drug addicts walking in and out of a library, hanging around and doing who knows what else. I dont approve my tax payer money being used for this. I really hope that whoever is in charge of this considers this idiotic, unfathomable option. Just as bad as encampments in parks. Hamilton, tell us you don't care about community and families without telling us. Just dump the problems and call it a solution.
