Re: Support for Elfrida Lands Urban Boundary Expansion

Dear Mayor Horwath and Members of Council,

As a proud trade partner of Marz Homes, we are writing to express our full support for the proposal to bring the Elfrida Lands into the City of Hamilton's urban boundary.

This expansion would not only create significant long-term opportunities for our business and employees, but it would also help address the critical need for more housing in our region. Our company, like many others in the trades, relies heavily on ongoing development and construction activity to keep our teams working and our business sustainable.

Approving this boundary expansion would support local employment, strengthen economic growth, and directly contribute to building more livable communities for families across Hamilton.

We urge Council to recognize the positive impact this initiative will have and to approve the inclusion of the Elfrida Lands in the urban boundary.

Sincerely

Mike Nardi
