Subject: Fwd: Cycling infrastructure is vital!!! Please include for Feb 6th meeting

Hello

This letter has been formulated to the ward 8 counselor and I would appreciate it being included in the meeting on February 6th to advocate on behalf of the initiatives to support the expansion of the cycling infrastructure and to ensure that it is not paused; as it should be getting as much funding and attention as it deserves to help benefit the community here as well as balancing out the pollution from local industrial plants.

Thank you for your time

Alison Pipe

Cyclist & community member.

To: <ward8@hamilton.ca>

Hi Representative of ward 8.

It's come to my attention that the initiative to improve and expand the cycling infrastructure for Hamilton may be potentially put on pause after the recent GIC meeting.

It would be a gross misrepresentation of the needs and preferences of the community here to allow this initiative to be neglected. The cycling numbers represent a sufficient population of cyclists and with access to infrastructure the population grows through example and representation.

If you build it they will cycle!!!!

The city's pollution and traffic are issues that impact our overall reputation in Hamilton and solutions reflect a prosperous and ambitious city. To neglect these projects would be a bad look as the climate crisis and subsequent effects of roadways and vehicles contribute to the pollution and lower quality of life in Hamilton for everyone.

Please have this letter included in the February 6th meeting!

The keddy access save my life during the pandemic allowing to gain and maintain my mobility as someone with a chronic condition.

I am not the only one with stories like this.

Please advocate for non drivers and cyclists on this important matter.

Alison Pipe
