Subject: No cuts to climate action!

External Email: Use caution with links and attachments.

Hello,

I wanted to send this email to express my concern and to make it clear that I do not support any cuts to the climate action initiatives in our city.

Shame on the Councillors and Matthew Francis especially for supporting these motions, as I was a friend and peer of his our entire childhood and youth, and grew up on Hamilton beach with him. I find it very disappointing that he would support and put forward these motions considering he grew up on the shore of one of the very places in the city that we need to use climate action reserve to protect!

Promoting and investing in bike pathways not only supports the environment, but also the health of our community!
