

Re: Safari Road Closure

Dear Mayor and City Councillors of Hamilton

The effects of a warming climate has considerably heightened our attention to the environment and our relationship to it. The earth's climate affects us and our actions affect the earth's. This relationship is currently in crisis. Decisions we make have a crucial affect on the quality of our role as stewards of our environment.

It's been a long time since I crossed over Safari road on my way to visiting Rockton. I'm writing to urge you to carefully consider both sides of this relationship we have with our environment in your planning process regarding "Safari Road Closure".

While not always uppermost, these processes always have both moral and human rights issues.

Yours sincerely,

Don Brown
