To make a request for Capital Funding so that Theatre Aquarius can complete our Sustainable Prosperity Project: Theatre Aquarius Renewal with Energy Efficiency. We anticipate a total project cost of \$1,310,000 and we have secured \$1,012,000 for this project. Now that our theatre centre is 20 years old, three key building components have reached the end of their life-cycle and are negatively affecting the theatre experience for our 125,000 annual patrons. This major infrastructure energy retrofit has significant benefits for the city, environment and Theatre Aquarius: substantially reduce our greenhouse gas emissions, reduce the urban heat island effect and lower our energy and short term maintenance costs. The three key elements are: Removal and replacement of our leaking roof system (30,000 sq.ft) to provide thermal resistance, insulation and a reflective surface which reflects sunlight, absorbs less heat reducing our ecological footprint. Reduce our energy consumption by replacing 8 Trane rooftop HVAC units with high efficiency units employing heat recovery technology, reducing the building's overall energy consumption. Replace exterior wall of glazing that fronts our theatre centre with new, argon-filled double glazed sealed units to both reduce heat lost from the building and reduce air conditioning loads through the decline in solar heat gain.
