As you are aware, Ontario has felt the effects of the global recession and is running a deficit in order to create jobs and protect public services. While the contributions of those who deliver public services are valued and appreciated, the public also expects those who are paid by tax dollars to do their part to help sustain public services.

The government has passed the Public Sector Compensation Restraint to Protect Public Services Act 2010, which freezes compensation plans for all non-bargaining employees in the broader public sector, including the Ontario Public Service, for two years. For employees who bargain collectively, the government will respect all current collective agreements. When these agreements expire and new contracts are negotiated, the government will work with transfer payment partners and bargaining agents to seek agreements of at least two years' duration that do not include net compensation increases. The fiscal plan provides no funding for compensation increases for future collective agreements.

Funding provided by the province to transfer payment partners and agencies is for the purpose of providing and protecting public services and is not to be diverted to fund increases in employee compensation.

If you have any questions, please contact Jennifer Pritchard at (416) 327-7430 or by email at jennifer.pritchard@ontario.ca

Thank you for your continued support and cooperation in protecting and promoting the health of Ontarians.

Yours truly,

Allison J. Stuart
Assistant Deputy Minister
